

ABOUT DUNDEE 2010

statistics
demographics
general reference material

Foreword

Welcome to About Dundee 2010, the ninth edition of the booklet. About Dundee is a compilation of frequently requested, useful statistics about Dundee. The information is provided in both tabular and graphical form, with accompanying comments on some of the main points to note.

Where possible the most recent figures available at the time of production have been used. In some categories the only information available is from the 2001 Census. All the information from this booklet may be copied or referred to, providing the appropriate acknowledgement of the source is clearly stated. Sources are given at the foot of each table, graph, map and commentary. Maps have been included to provide a schematic overview, requests for further information should use the email address below

A limited number of paper copies are produced and circulated at the time of the initial publication. Main access to the document is available on-line, enabling individual pages to be printed off or copied and pasted - the booklet is located on the Dundee City Council web site at:

www.dundee.gov.uk/dundeecity/uploaded_publications/publication_2005.pdf

The booklet is produced by the Information & Research Team based in the City Development Department.

1 Introduction

Dundee is Scotland's fourth largest city and is situated on the north coast of the mouth of the Tay Estuary, in a stunning location. Edinburgh lies 60 miles to the south, and Aberdeen 67 miles to the north.

The most recent estimate of Dundee's population is 143,390 (General Register Office for Scotland (GROS) 2009 Mid-year Population Estimate). Dundee has a sizeable student population, and is home to the University of Dundee, the University of Abertay Dundee and Dundee College.

The Dundee City Council area covers 6,300 hectares (24 square miles) and is, geographically, the smallest local authority area in Scotland. It is bordered by Perth and Kinross Council to the west and Angus Council to the north and east. The former Tayside Regional Council area previously covered all three councils, and Dundee continues to serve as the regional centre for this area and north-east Fife, with an estimated catchment population of some 400,000 people.

Dundee is Scotland's sunniest city, with an average of over 1,500 hours of sunshine per year from 1971 to 2000. [Met Office]

Easy access is available in Dundee to the main road and rail networks. The A90 Edinburgh to Aberdeen Road passes through the City, and the Tay Road Bridge connects to north-east Fife. Regular First ScotRail services between Glasgow and Aberdeen, and Edinburgh and Aberdeen stop at Dundee, as do GNER services between London Kings Cross and Aberdeen. Virgin also provides daily cross-country train services between Dundee and Carlisle, via Edinburgh. Scottish City Link and Stagecoach operate bus services between Dundee and Perth, Edinburgh, Glasgow, Aberdeen, Fife and other destinations.

Dundee Airport, located in the heart of Scotland, is the most convenient fly-in destination for some 1,000 square miles of Central Scotland. Situated only two miles from Dundee City Centre, and less than 10 minutes by taxi from mainline rail and bus stations, it affords quick and easy access to Fife via the nearby Tay Road Bridge, and lies within five minutes of the main Scottish Trunk Road network. There are scheduled flights between Dundee and London City Airport, Belfast, Birmingham and Jersey (summer 2009).

Dundee is the only Scottish city to be featured in the Here and Now UK edition of the board game Monopoly. The place was won by an online poll by the game's manufacturer Parker. The square features a picture of Claypotts Castle and has a price tag of £2.2m

Dundee is twinned with:

- Wurzburg (Germany)
- Nablus (Palestine)
- Orleans (France)
- Zadar (Croatia)
- Alexandria (Virginia, USA)

Dundee's Sister City is:

- Dubai (United Arab Emirates)

² GROS use a smaller land area figure for Dundee (ca 5,983 ha) than that quoted above.

3 Population

Dundee City Council has an estimated population of **143,390** as of the 30th June 2009 (GROS Mid Year Estimate). Chart 1 shows historical population totals for the City since 1801, and indicates estimated population projection to 2033.

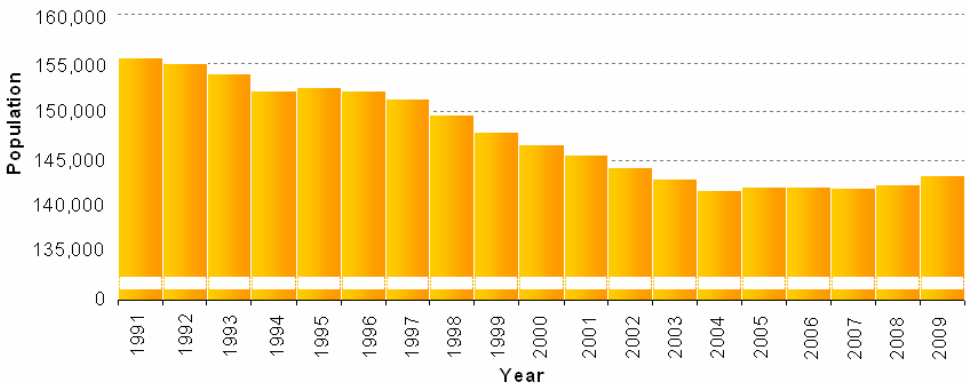

Chart 1: Dundee City's historic and projected population, 1801 to 2033

(source: GROS)

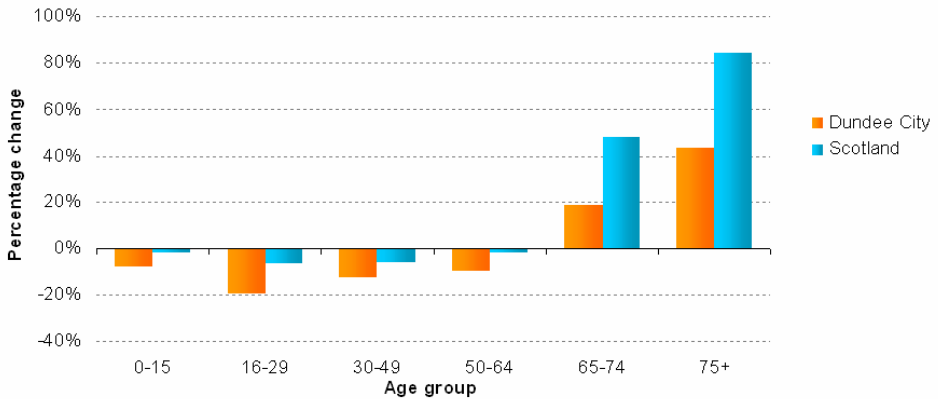

Chart 2 focuses on the change in population since 1991. It can be seen that the estimated population experienced a gradual decline until 2005 when the figure stabilised. GROS population estimates since 2007 have shown a slight increase.

Chart 2: Dundee City's population, 1991 to 2009

(Source: GROS)

By 2033 the population of Dundee is projected to be 135,229. This is a decrease of 5.7% compared to the estimated population in 2009. The distribution of the change by age group is shown in Chart 3. The chart includes Scotland's figures for comparison. Over the 25 year period, the age group that is projected to increase the most is the 75+ plus age group.

Chart 3: Projected population change for Dundee City and Scotland by age group, 2008 to 2013

(Source: GROS)

Table 1: Dundee City, projected population change by age group at five year intervals, 2008 to 2033

Age group	Base year	Projected years				
	2008	2013	2018	2023	2028	2033
0-15	23,671	24,299	25,432	25,321	23,612	21,813
16-29	32,662	30,415	25,878	24,362	25,088	26,312
30-49	35,469	35,135	35,861	35,349	34,920	30,997
50-64	25,015	25,903	26,424	25,488	22,322	22,594
65-74	13,018	13,432	13,824	13,981	15,220	15,450
75+	12,635	13,488	14,185	15,607	16,733	18,063
All ages	142,470	142,672	141,604	140,108	137,895	135,229

(Source: GROS)

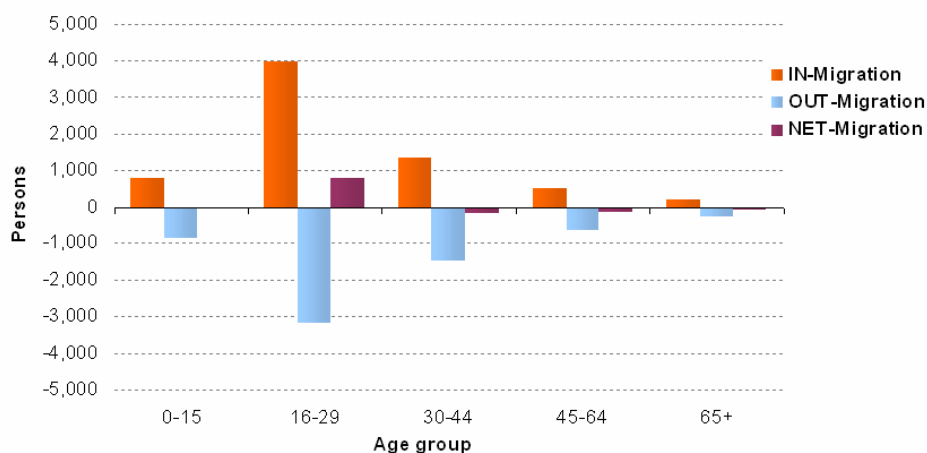

Table 1 gives a more detailed breakdown of the projected change in population to 2033.

Table 2: Components of population change, 2008 to 2009

	Births	Deaths	Migration (and other)	Net Change
Aberdeen City	2,557	2,089	2,942	3,410
Dundee City	1,778	1,667	809	920
Edinburgh, City of	5,502	4,266	4,774	6,010
Glasgow City	7,331	6,723	3,622	4,230
Perth and Kinross	1,445	1,533	1,818	1,730
Stirling	863	830	357	390
Scotland	59,331	54,746	20,915	25,500

(Source: GROS)

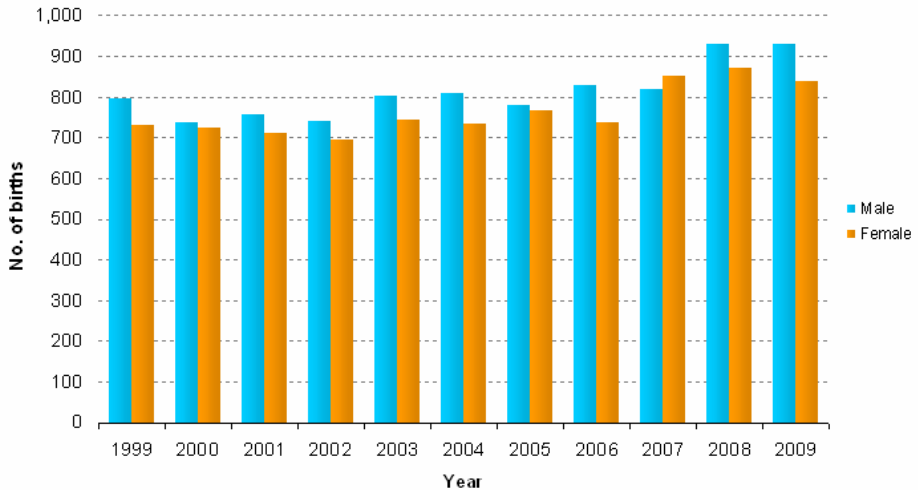

Recent years have seen an increase in the total population of Dundee. Table 2 shows that this increase is due primarily to a rise in the net immigration to the City. There was also a positive total for natural change, i.e. more births than deaths.

Chart 4: Migration, in, out and net, Dundee City annual average, 2007 to 2009

(Source: GROS)

Migration in and out of Dundee is summarised in Chart 4. On average in 2007-2009 there was a net inflow of 339 people into Dundee City per year, meaning that more people entered Dundee than left. The 16 to 29 year old age group accounted for the largest group of in-migrants into Dundee City. The largest number of out-migrants was also in the 16 to 29 age group.

Chart 5: Live births by sex, Dundee City, 1999 to 2009

(source: GROS)

The number of live births in Dundee for the past decade is shown in Chart 5. In 2009 there were 1,768 live births in Dundee; this was a 1.8% decrease from the year before. This equates to 56.7 births per 1,000 women aged 15 to 44.

Table 3: Most popular baby names in Dundee, 2009

Boys' names	Number of babies	Girls' names	Number of babies
Jack	20	Chloe	16
Finlay	17	Emily	16
Daniel	16	Sophie	12
Liam	16	Hannah	11
Lucas	15	Lucy	11
Lewis	14	Erin	10
Oliver	14	Jessica	10
Cameron	11	Olivia	10
Logan	11	Abbie	9
Aiden	10	Ava	9
Owen	10	Brooke	9
Ryan	10	Isla	9

(Source: GROS)

In 2009 the most popular baby boy's name in Dundee City was Jack, for girls it was Chloe. The top ten names for each sex are listed in Table 3. The top one hundred names for Scotland can be accessed at www.gro-scotland.gov.uk

Table 4: Sex composition, Scottish cities, 2009 based estimates

	Male	%	Female	%	Total
Aberdeen City	105,808	49%	108,002	51%	213,810
Dundee City	68,038	47%	75,352	53%	143,390
Edinburgh, City of	230,896	48%	246,764	52%	477,660
Glasgow City	284,679	48%	303,791	52%	588,470
Scotland	2,515,288	48%	2,678,712	52%	5,194,000

(Source: GROS)

The proportion of males and females in Dundee, other major Scottish cities and Scotland as a whole is shown in Table 4. It can be seen that Dundee has a slightly higher proportion of females than elsewhere. The population pyramid in

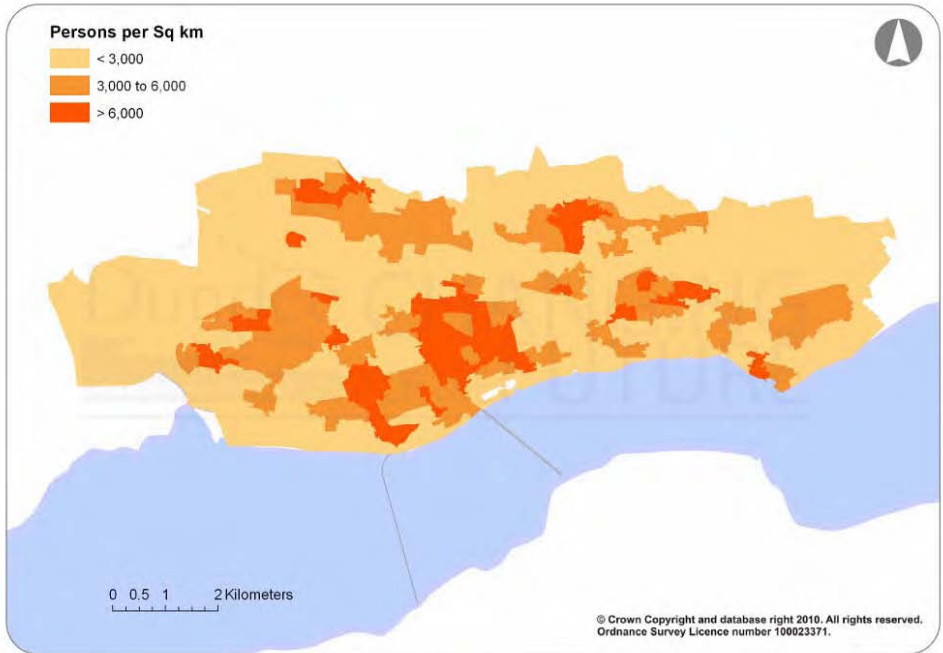

Chart 6 shows the breakdown of males and females in five year age groups for Dundee. Scotland is shown for comparison. The peak population in age group 20 to 24 represents the high proportion of students in Dundee.

Chart 6: Dundee and Scotland Population Pyramid 2009

(Source: GROS)

Map 1: Population density for Dundee 2009

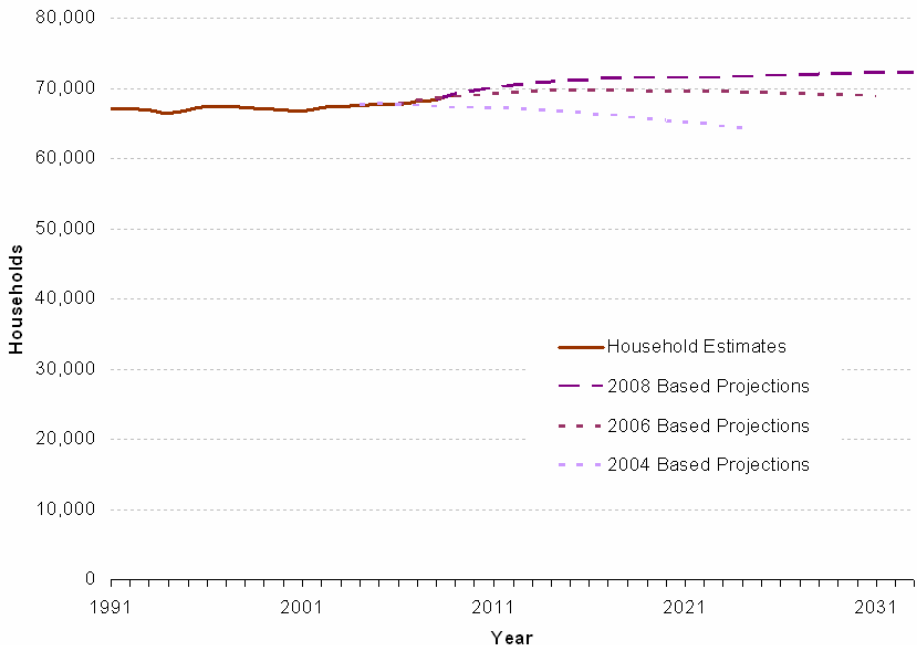

(Source: GROS)

Dundee City Council is an urban local authority which 2,276 persons per square kilometre, second only to Glasgow City Council which has (3,353 persons per square kilometre). If we compare the immediate surrounding areas Angus Council has 51 persons per Sq Km and Perth and Kinross Council 28 persons per Sq Km.

Map 6 shows where population density is spread across the City, the areas in deep red being where a higher number of people live. The largest areas with a high population density are those to the north and west of the city centre.

4 Housing

Chart 7: Household Estimates and Projections 1991 to 2033

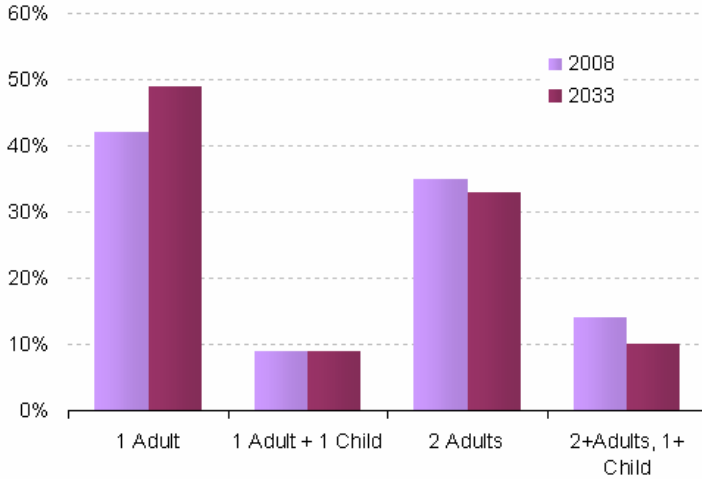

(Source: GROS)

The current estimated number of households in Dundee City is 69,228 [GROS 2009 mid year estimate]. It is projected that this figure will rise by around 6% to 72,290 by 2033 [GROS 2008 based projections]. As seen in Chart 7 previous mid year household projections had anticipated less of an increase than the current figure; in 2004 a decline was predicted.

Chart 8 shows the household estimates and projections by number of persons in the household. The proportion of one person households is predicted to increase from 42% to 49% by 2033. Households with two or more adults and one or more children are forecast to drop from 14% to 10% of all households over the same period.

Chart 8: Household Estimates and Projections by Household Type

(Source: GROS)

75% of properties in Dundee are within the council tax bands A-C, 21% in D-E and 4% in F-H.

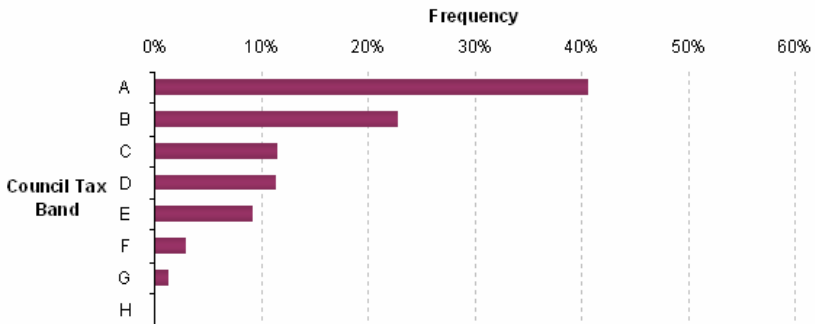

Council Tax Bands are based on estimated property values as at 1st April 1991.

Bands A to C - properties up to £45,000

Bands D to E - properties £45,000 to £80,000

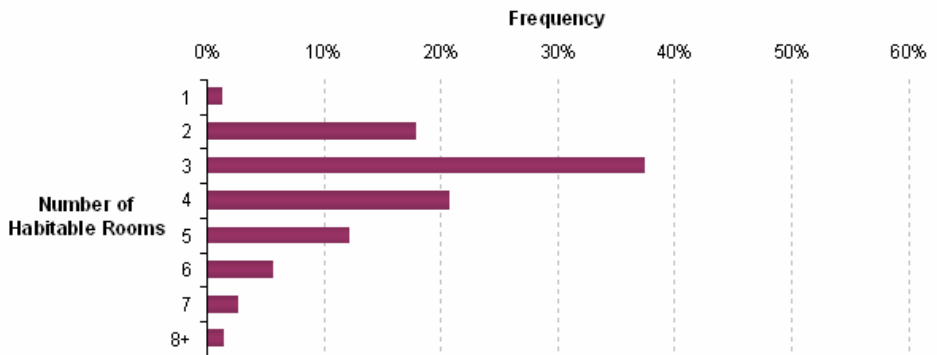

Bands F to H - properties over £80,000

Chart 9: Distribution of properties by Council Tax Bands

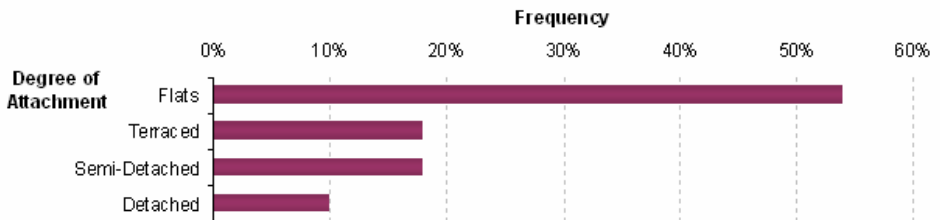

(Source: SNS)

House Site Monitoring

This data is collected from an internal database which allows us to obtain data at individual dwelling completion level on a frequent basis.

Chart 12: House Site Monitor completions 2009 by dwelling type

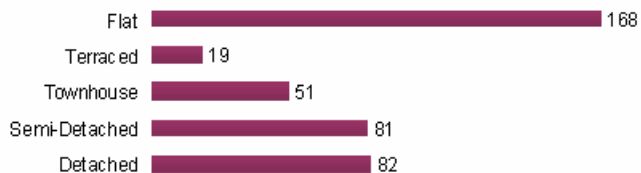

Chart 13: House Site Monitor monthly completions by type for 2009

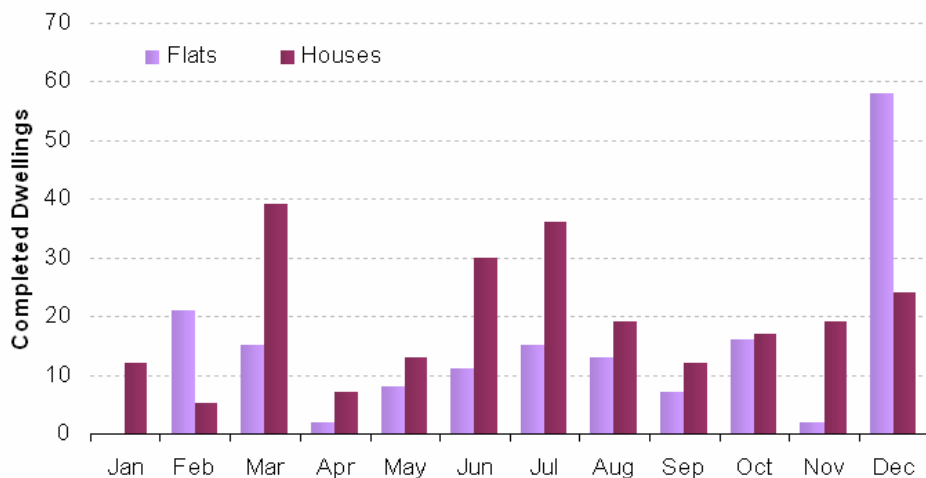

Chart 14: Volume of residential property sales per quarter**(Source: GROS)**

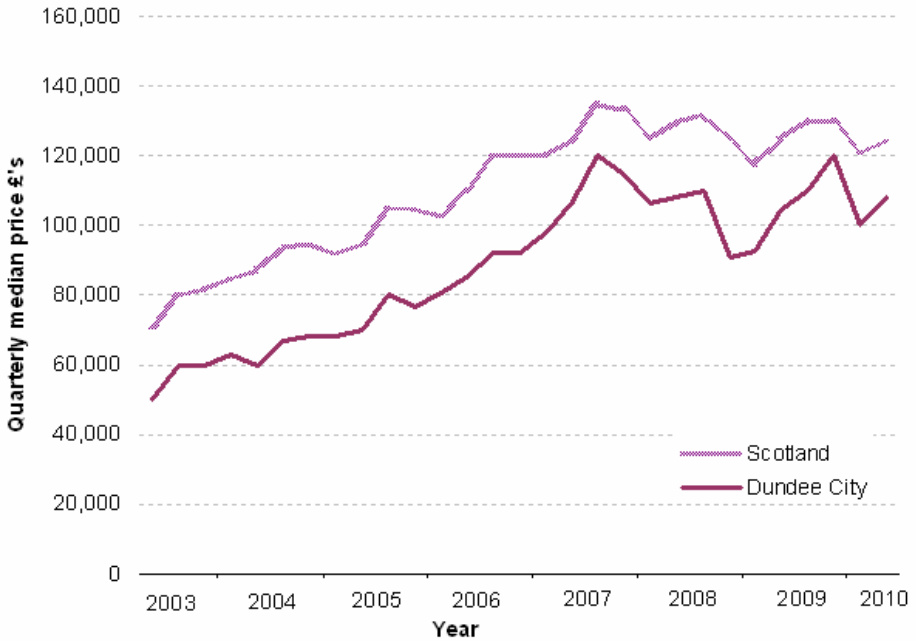

Chart 14 shows the number of residential sales per quarter for Dundee. A clear seasonal pattern can be seen, with more property sales taking place during the summer months. From 2003 until 2007 the year on year increase in sales volume due to the property boom can be seen. The effects of the recent recession and stalling of the property market are clearly visible with the slump in sales volumes during 2008. This is a pattern that is reflected across Scotland.

Chart 15 compares the quarterly median property prices for Dundee and the whole of Scotland. Again the property boom is clearly evident from 2003 to 2007. Since then Scottish property prices have remained largely stagnant with only seasonal fluctuations evident. Dundee has tracked the movement of Scottish property prices very closely. Since 2007 Dundee property prices have fluctuated more than Scottish prices. This will be, at least in part, due to the smaller size of the Dundee property market.

In **2003** the median property price in Dundee was **70%** of that in Scotland.

In **2010** the median property price in Dundee is **86%** of that in Scotland.

Chart 15: Quarterly median residential property prices for Dundee and Scotland. 2003 to 2010

(Source: RoS)

Table 5: Quarterly Median Property Prices for Dundee and Scotland. 2009 and 2010

(Source: ISD Scotland)

Chart 23: Life expectancy at birth. 2007-2009 based

(Source: GROS and National Statistics)

Life expectancy is an estimate of how many years the average person might be expected to live, commonly based on life expectancy at birth, which is the average number of years a newborn infant can expect to live if current mortality rates continue to apply. As displayed in Chart 23, there are variations in life expectancy across Tayside's local authority areas, with Dundee males expecting to live 4.5 years less than those in Perth and Kinross, and a corresponding difference of 2.4 years in females.

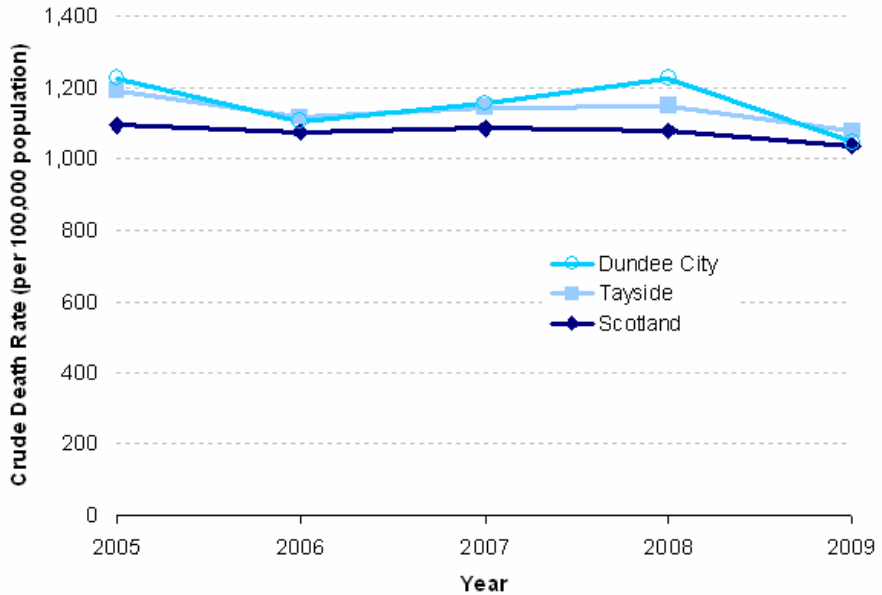

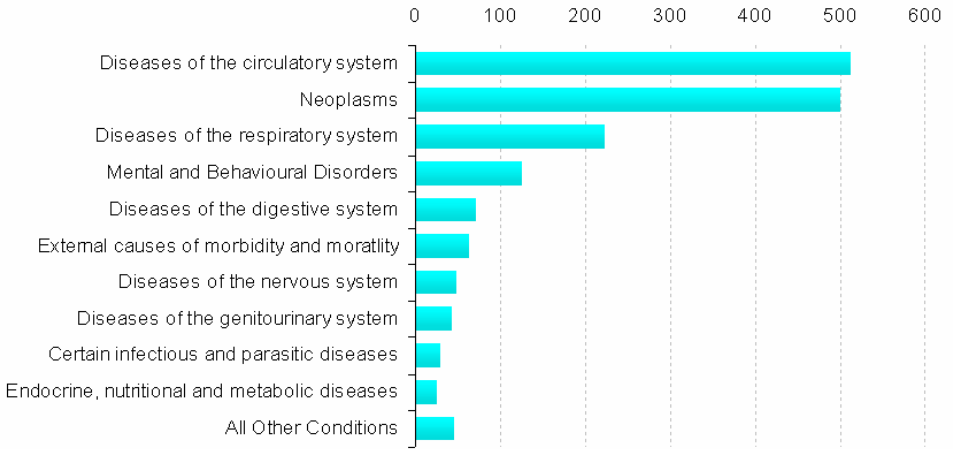

Chart 24: Crude Death Rates (All Ages) per 100,000 Population, 2005-2009**(Source: GROS)**

Chart 24 displays the crude death rates per 100,000 population for Dundee City, Tayside and Scotland for the previous five years. For each of these five years Dundee City and Tayside had a higher crude death rate than Scotland.

Despite year on year fluctuations over the past five years, 2009 demonstrated the lowest crude death rate for Dundee City over this period, with 1049.3 deaths per 100,000 population

**Chart 25: The ten main causes of death in Dundee City, 2009 (All ages).
Total number of deaths = 1,693**

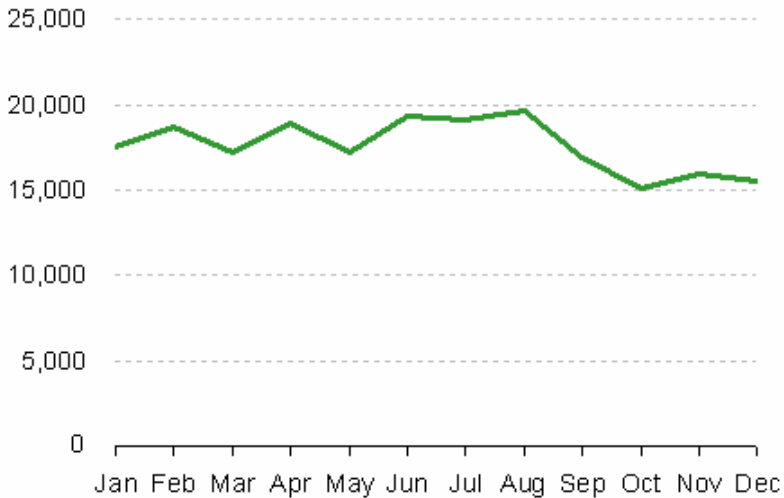

(Source: GROS)

Chart 25 summarises the top ten main causes of death in Dundee City. Malignant neoplasm of bronchus and lung caused greatest number of cancer deaths, accounting for 27.9% of all cancer deaths (8.3% of all deaths) in 2009. Over the last five years lung cancer has continually had the highest number of all cancer deaths within all three Tayside local authority areas.

9 Scottish Index of Multiple Deprivation

The Scottish Index of Multiple Deprivation (SIMD) 2009 was released by the Scottish Executive in October 2009. It is a deprivation index with a range of indicators making up each of the seven constituent domains, which are:

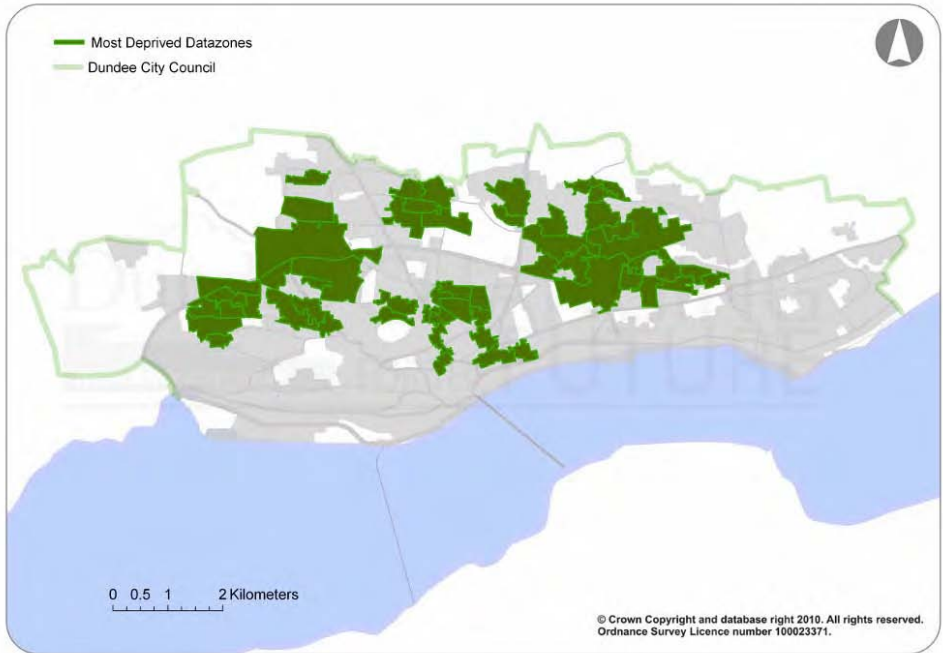

- current income
- employment
- health
- education, skills and training
- geographic access, telecommunication and housing.
- crime

Chart 29: Percentage of population living within the data zones ranked the 15% most deprived in Scotland

(Source: SNS)

Map 2: Data zones ranked within the 15% most deprived in Scotland

Population

The SIMD 2009 analysis was produced using the 2007 Small Area Population Estimates (SAPE). By using the 2007 SAPE the estimated population living within the 15% MD can be calculated for each Local Authority.

The SIMD 2009 estimated in Dundee City there were 41,454 people living in the data zones ranked within the 15% MD in Scotland. This is 29.2% of the total Dundee City population.

The percentage of the Dundee City population living in the data zones ranked within the 15% MD in Scotland has risen marginally from previous figures of 28.8% in the SIMD 2006 and 28.3% in the SIMD 2004.

Data Zones

Dundee City had 53 and 55 data zones within the 15% MD in Scotland according to the SIMD 2006 and SIMD 2009 respectively. Between the two SIMD publications 5 data zones moved out of the 15% MD data zones in Scotland and 7 data zones moved into the 15% MD data zones in Scotland.

10 Political Representation

	Nigel Don	■ Scottish National Party (SNP)
	Marlyn Glen	■ Scottish Labour
	Alex Johnstone	■ Scottish Conservative and Unionist
	Alison McInnes	■ Scottish Liberal Democrats
	Nanette Milne	■ Scottish Conservative and Unionist
	Maureen Watt	■ Scottish National Party (SNP)

11 Tourism

It is estimated that in 2009, UK tourists made around 0.43 million trips to Dundee and Angus, staying for around 1.5 million bed-nights and spending £74 million.

Overseas visitors to the region made 70,000 trips, staying for 0.71 million nights and spending £31 million.

The top international origins of the trips are the USA, France and Canada. The top international sources of expenditure are the USA, Canada and the Netherlands.

Of those trips by visitors from the UK, 51% of trips were taken by Scottish residents and 45% were taken by English visitors.

Table 27: Purpose of visit for UK and Overseas visitors to Dundee and Angus 2009

Purpose of visit	Visitor Origin	
	UK	Overseas
Holiday	60%	26%
Visiting Friends and Relatives	21%	46%
Business	17%	19%
Other	3%	9%

12 Climate

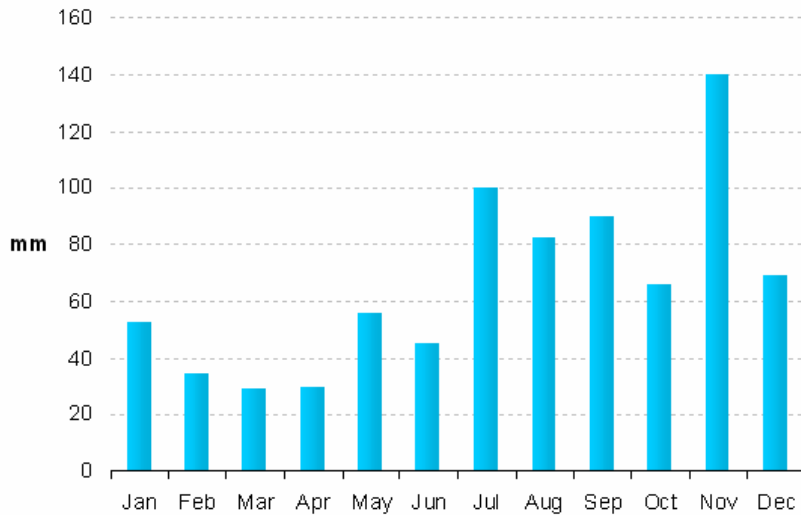

Dundee is home to a changeable, temperate climate. Influenced by its coastal location, the weather in Dundee is surprisingly mild for a Scottish City. The autumn and winter months are amongst the wettest of the year, with a higher rainfall than the spring and summer seasons. Winter weather in Dundee can be mild at times, although strong breezes often make the climate feel cooler.

The nearest Met Office recording station is at Leuchars, some seven miles to the south. Leuchar's proximity to Dundee means that the two locations experience essentially the same weather. The following charts all show data for Leuchars for 2009.

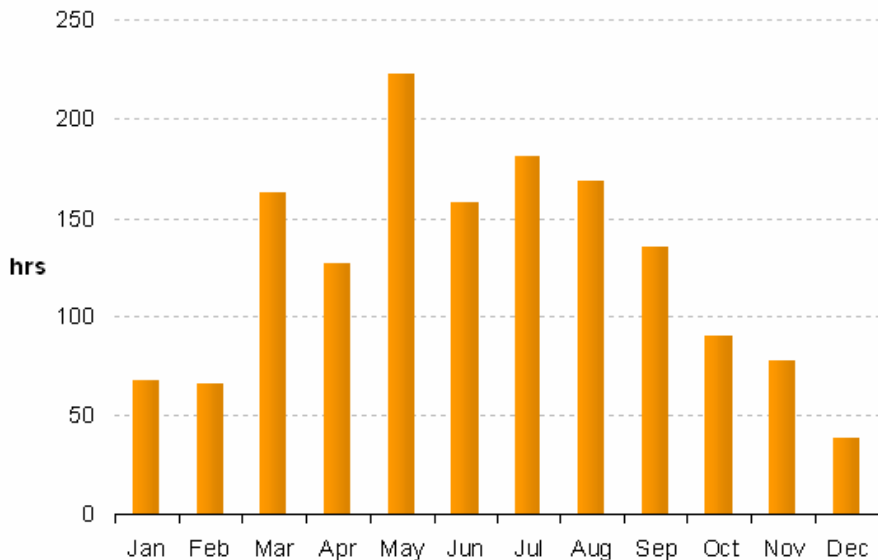

Chart 33: Monthly average maximum and minimum temperatures for 2009

(Source: Met Office)

Chart 34: Monthly rainfall totals 2009

(Source: Met Office)

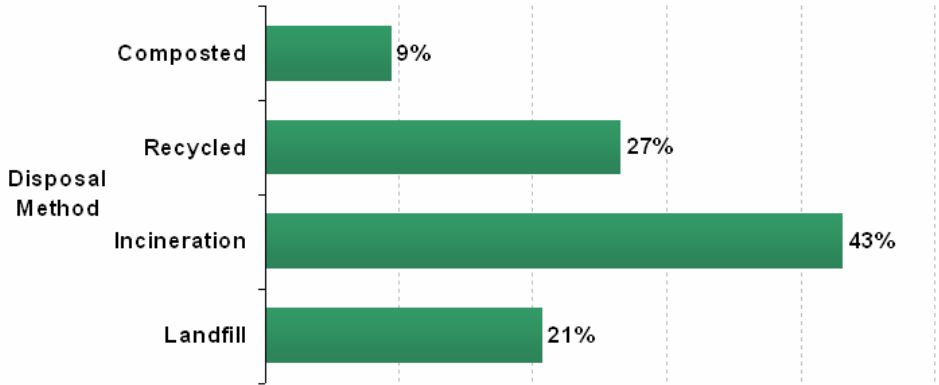

Chart 35: Monthly sunshine totals 2009

(Source: Met Office)

13 Environment

In the financial year 2008/2009 Dundee City Council dealt with **93,956** tonnes of municipal waste. The proportion disposed of by each disposal method is shown in Chart 36.

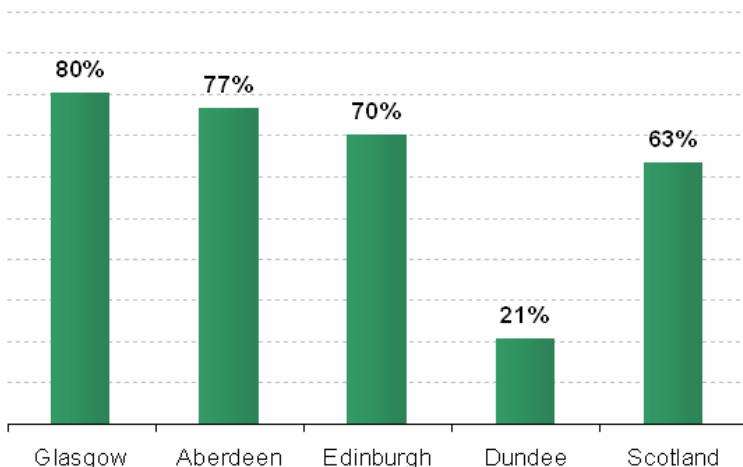

Chart 36: Disposal methods for Dundee's municipal waste (2008/2009)

(Source: SEPA)

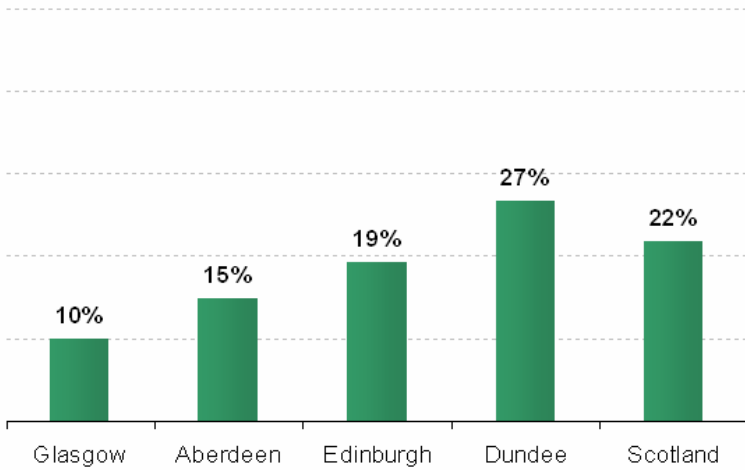

It can be seen that Dundee's principal method of waste disposal is incineration. This allows Dundee to keep its proportion of waste sent to landfill significantly below that of other cities in Scotland, as shown in Chart 37.

Chart 37: Percentage of municipal waste sent to landfill in 2008/9 for major cities and Scotland

(Source: SEPA)

Chart 38: Proportion of municipal waste recycled in 2008/9 for major cities and Scotland
