

## **6 OLYMPIA LEISURE CENTRE**

### **(a) IMPROVEMENT PROGRAMME (AN151-2005)**

As part of the 2005/06 Improvement Programme for the Olympia Leisure Centre the following offers are recommended for approval.

- a quote has been received from specialist contractor, Aqua Systems, Denmark, for an ultraviolet water treatment unit for toddler pool and leisure pool.

In respect of water treatment, using a UV unit significantly reduces the need for chemical dosing with associated improvements in the water quality, and that the trial and subsequent unit that has been purchased already for Olympia training pool has resulted in savings in both the water charges and the chemicals.

It is recommended that the offer of £23,037 from specialist contractor, Aqua Systems, Denmark, is accepted.

This expenditure of £26,717 can be met from the Leisure and Arts Department's 2005/06 Capital Budget.
