

5 SCOTS - NATIONAL ROADS DEVELOPMENT GUIDE (AN199-2014)

The SCOTS Development Control Group, of which DCC has a representation, has produced a document entitled National Roads Development Guide (NRDG).

This document is an online publication (accessed via the link www.pkc.gov.uk/roadsdevguide) and is to be seen as a Scotland wide document which issues roads technical guidance to local authorities, developers, agents and other interested parties. The document is seen as a replacement for individual local authority guidelines although the document will include appendices that show local authority variations.

DCC current guidelines are within the "Streets Ahead" document. It is proposed to update this document in line with the NRDG and revise/update accordingly.

Committee is requested to note this document will be used as supporting guidance associated with planning applications and road construction consents, and is requested to refer it to the Development Management Committee, as a material planning consideration.
