

4 REMADE SCOTLAND, PHASE II (AN297-2002)

A request has been received from COSLA to all Councils in Scotland to fund REMADE Scotland, to support the development and strengthen markets for recyclables recovered from waste. This organization assists Scottish local authorities through the provision of technical events and specialist reports, as required.

The proposed contribution sought from each Council is based on households, and the Committee is requested to authorise a contribution of £2,000 per annum for the next three years.
