

4 LOCAL AIR QUALITY MANAGEMENT REGIME - MAINTENANCE CONTRACTS (AN45-2008)

In accordance with the Local Air Quality Management Regime, Dundee City Council is required to undertake further assessment of particulates (PM₁₀) in relation to the 2010 PM₁₀ objective.

Dundee City Council has been awarded a grant of £6,650 under the Local Air Quality Management - Capital Grant Scheme 2007/2008 for the renewal of the maintenance contracts for the five OSIRIS monitors which monitor PM₁₀ at various locations across the city.

The maintenance contracts for the air quality monitors (OSIRIS) are now due. In order to maintain the continuity of the data it is recommended that the maintenance contracts be renewed with the original provider of the equipment.

The Committee is therefore asked to approve the renewal of the maintenance contracts for the OSIRIS monitors with Turnkey Instruments Ltd. at the cost of £6,650.

This expenditure can be met from the Environmental Health & Trading Standards Department's 2007/2008 Revenue Budget.
