

**6 AIR QUALITY – PURCHASE OF ADDITIONAL ACCESSORIES FOR PARTICULATE MONITORS (AN492-2004)**

Reference is made to Article V of the minute of meeting of the Environmental Services and Sustainability Committee of 21st June, 2004 which approved the purchase of five Osiris Environmental Particulate Monitors from Turnkey Instruments.

To facilitate effective data management and data validation, it is proposed that a three year maintenance contract is taken out and the units are fitted with modems. In addition, "Enview 2000" software is purchased to enable comparisons to be made with the data collected by the TEOM Environmental Particulate Monitors that are located in Union Street and Dock Street.

Dundee City Council has been awarded a grant under the Local Air Quality Capital Grant Scheme 2004/2005 towards the purchase and installation of PM<sub>10</sub> monitoring equipment and the Scottish Executive are supportive of the above proposals.

The Committee is therefore asked to approve the purchase of the following:-

Three year Maintenance Contract	-	£3,225
Retrofitting of the Osiris Units with Modems and Flow Meter	-	£3,976
Enview 2000 Software Package, Training and Support	-	£4,433

This expenditure can be met from the Environmental Health and Trading Standards Department's 2004/05 Capital Budget.
