

### **3 UNIT RATE CONTRACT FOR INVESTIGATION OF POTENTIALLY CONTAMINATED LAND (AN534-2003)**

Reference is made to Article II of the meeting of the Environmental and Consumer Protection Committee on 17 September 2001, when the Strategy for Contaminated Land was agreed.

As part of this strategy the City Engineer recommended that a Unit Rate Contract was utilised to obtain rates from a number of specialist contractors experienced in contaminated land site investigation. This Contract has been updated to reflect current testing methods and practices.

Tenders for the Unit Rate Contract have now been submitted by the undernoted specialist contractors:

Aitken Laboratories Limited, Castlehill House, Slamannan  
Ritches, Glasgow Road, Kilsyth, Glasgow  
Soil Mechanics Ltd, Askern Road, Carcroft, Doncaster

Authority is now sought to use the most favourable tender for any future contaminated land site investigation work.
