# 1-Introduction

---

The annual audit of housing land provides a factual statement of land supply within the administrative boundaries of Dundee City Council.

The audit provides an important source of information for the monitoring of the Dundee Local Development Plan 2019 and TAYplan Strategic Development Plan.

The audit identifies that there is an existing generous effective supply of land for housing across the City.

The Dundee Housing Land Audit 2022 has been prepared in line with Scottish Planning Policy and PAN 2/2010: Affordable Housing and Housing Land Audit and provides a snapshot in time of the housing land supply within the City as of April 2022.

## 2 - General Principles

---

The audit provides a range of information relating to each housing site:

- The schedules in Sections 5, 6 and 7 are grouped by effective supply and constrained supply, as defined by the SPP, and within PAN 2/2010.
- Each site has a unique site reference followed (where appropriate) by the Local Development Plan reference, the name of the site and the owner, developer or applicant.
- The status of the site relates to whether the site is under construction, identified in the Local Development Plan or has planning permission or other Council approval.
- The approval date given refers to the latest date that planning permission was issued.
- The number of houses still to be completed on each site is included and an assessment is made of the potential yield from the site in the programming columns

All sites in the Dundee City Council area fall within the Greater Dundee Housing Market Area.

The potential yield figures included within the audit take into account past trends and completions, either on-site or within the housing market area.

Section 10 sets out the total number of completions by tenure; this includes the completions from small sites (5 or less units) that are set out in Section 8.

## 3- Consultation

---

The Draft Housing Land Audit (HLA) 2022 was prepared following a positive pre-consultation engagement process, which included a meeting with HfS and housebuilder members at an early stage. All information submitted at this stage was included in the Draft Audit for comment by consultees. The Draft was subsequently sent out for consultation to the Scottish Government's Housing and Regeneration Directorate; Homes for Scotland (HfS); Scottish Water; the Dundee Local Development Plan mailing list and members of the public via the Dundee City Council website. We received detailed comments and revisions to programming and these have been either integrated or responded to within HLA 2022.

The 2021/22 report reveals that housebuilding levels in Dundee are at their highest since 2009 with 524 housing units completed over the past year. Completions on brownfield sites accounted for 54% of total completions.

We have co-ordinated positive consultation with HfS and have reached an agreed position on the vast majority of sites. The following sites are disputed, and marked with a \* in Audit to demonstrate this:

- Rannoch Road, Former Lawside Academy (200913)
- Lothian Crescent, Bowling Green East (201008)
- Land at Clatto (201413)
- Former Railyards, Greenmarket (201825)

The Housing Land Audit (2022) has been collated using the following sources:

- Planning & Building Standards Uniform System
- Up to date SHIP information from RSLs;
- Developer information returns;
- Dundee Housing Land Audit 2021
- Pre-consultation meeting with HfS and members

The Council carried out a post-draft consultation which provided an opportunity for developers/agents to provide feedback and up to date programming information for their sites. The feedback that we have received has helped inform the content of this audit, and responses were considered with necessary changes applied.

The Finalised HLA 2022 has been informed by the information and comments received throughout the consultation process, as well as existing information and knowledge that the Council has on each of the sites; including Strategic Housing Investment Plan (SHIP) funding, marketing and site disposal information.

The consultation on the Draft HLA 2022 received comments which raised a number of important issues including:

- Receipt of programming information from developer

To ensure the accuracy of this year's audit, we conducted early consultation with site owners/ developers to get up to date programming on a site by site basis. In some instances, there will be a difference between developer programming and published figure and this is due to a lag with our building warrant completions data. All completions will be updated as the information is available from our system and this ensures consistency for all future audits.

- Scottish Water – Surface water management

The issue of surface water management and their current policy which does not allow new connections into the combined drainage network was raised. Dundee City Council is working closely with Scottish Water and developers to find suitable solutions on sites (in particular brownfield sites) throughout the City. In some instances, innovative solutions have been created or are being discussed demonstrating a willingness by both developers and Scottish Water to deliver new housing. The Council also works closely with developers and Scottish Water on an individual site basis to overcome drainage issues to allow development to proceed. This situation will continue to be closely monitored, and planning and technical guidance have been produced to help applicants understand Dundee City Council's expectations and requirements in respect of the surface water and drainage information required to support planning applications for development in Dundee. These can be accessed via Dundee City Council's website.

- The reliance on brownfield sites for the delivery of an effective Housing Land Supply.

The designation and prioritisation of brownfield sites and the overall housing strategy for Dundee has been fully considered and examined through the adoption of the Dundee Local Development Plan 2019. The Housing Land Audit is not a mechanism for setting the housing strategy or for allocating new sites, this will be actioned through the review of the LDP.

- Site specific comments on programming, delivery and constraints.

Where appropriate, amendments have been made to programming of sites to reflect comments made during the consultation. We have also constrained the following sites: Lothian Crescent (200353), Princes Street (200728), Barns of Claverhouse Road, Land At, Mom Phase 4 (201220). We provided a line by line response on site specific queries to Homes for Scotland and reached an agreed position on the majority of sites.

5 Year Supply: As per Planning Advice Note (PAN 2/2010) Affordable Housing and Housing Land Audits, "Planning authorities should use the information from the audit process to ensure that at all times sufficient effective land is available to meet the housing land requirement for at least the following 5 years." The 7-year supply is not a requirement of the audit.

- Committee approval for disposal

DCC sites designated in the DLDP 2019 have been through the formal adoption process and therefore have been identified as effective. The majority of the DCC sites have either planning permission, funding confirmed in the SHIP, active developer interest or will be actively marketed during the life of the plan. Where there are known constraints, we have acknowledged this and removed from effective supply.

We trust that this is helpful in addressing some of the key themes with the Audit, which demonstrates that the housing demand for the next 5 years can be met from existing land allocations. We continue to promote the development of brownfield land and recognise the value this has in Dundee's continued growth.

# 4-Housing Land Supply

The TAYplan Strategic Development Plan sets the housing supply target for each local authority within the TAYplan area. The housing supply target figure for Dundee City has been set at an average annual build rate of 480 homes per annum over the plan period. The following table demonstrates that there is an effective 5 year housing land supply on both greenfield and brownfield sites within the City.

	22/23	23/24	24/25	25/26	26/27	LATER YEARS	5 YEAR EFFECTIVE SUPPLY	CONSTRAINED SITES	ESTABLISHED LAND SUPPLY
GREENFIELD	167	155	179	159	134	641	794	86	1435

# Appendix 1 Effectiveness Criteria

---

The following criteria for judging the effectiveness of housing sites within the established supply are taken from PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

**Ownership:** the site is in the ownership or control of a party which can be expected to develop it or release it for development. Where a site is in the ownership of a local authority or other public body, it should be included only where it is part of a programme of land disposal.

**Physical:** the site, or relevant part of it, is free from constraints related to slope, aspect, flood risk, ground stability or vehicular access which would preclude its development. Where there is a solid commitment to removing the constraints in time to allow development in the period under consideration, or the market is strong enough to fund the remedial work required, the site should be included in the effective land supply.

**Contamination:** previous use has not resulted in contamination of the site or, if it has, commitments have been made which would allow it to be developed to provide marketable housing;

**Deficit Funding:** any public funding required to make residential development economically viable is committed by the public bodies concerned.

**Marketability:** the site, or a relevant part of it, can be developed in the period under consideration.

**Infrastructure:** the site is either free of infrastructure constraints, or any required infrastructure can be provided realistically by the developer or another party to allow development.

**Land Use:** housing is the sole preferred use of the land in planning terms, or if housing is one of a range of possible uses other factors such as ownership and marketability point to housing being a realistic option.

## Appendix 2 Glossary and Terms

---

The definitions of terms used within the audit reflect the glossary contained in the SPP, (2014) and PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010).

**Brownfield land:** land which has previously been developed. The term may encompass vacant or derelict land; infill sites; land occupied by redundant or unused buildings; and developed land within the settlement boundary where further intensification of use is considered acceptable

**Constrained housing land supply:** the part of the established housing land supply which at the time of any audit is not considered to be effective.

**Effective housing land supply:** the part of the established housing land supply that is free or is expected to be free of development constraints in the period under consideration, and will therefore be available for the construction of housing.

**Established housing land supply:** the total housing land supply – including both constrained and unconstrained sites. This will include the effective housing land supply, plus the remaining capacity of sites under construction; sites with planning consent; sites in adopted local plans; and other land and buildings with agreed potential for housing development.

**Greenfield land:** land which has never been previously developed, or fully-restored formerly derelict land which has been brought back into active or beneficial use for agricultural, forestry, environmental purposes, or outdoor recreation.

**Housing Land Audit:** the mechanism for monitoring the housing land supply and identifying those sites within the established land supply which are expected to be effective within the period under consideration.

**Housing Land Requirement:** the difference between a figure arrived at by considering market demand, demographic need and other relevant factors, and the effective housing land supply.

**Housing Market Area:** a geographical area which is relatively self-contained in terms of housing demand; i.e. a large percentage of the people moving home or settling in the area will have sought a dwelling only in that area.

**Private sector housing:** housing for sale or rent provided by private developers or other commercial organisations. The term “owner-occupied sector” excludes the private rented element.

**Public sector housing:** general and special needs housing provision by registered social landlords and local authorities and other social housing providers for rent.
