

# Changes to your Waste and Recycling Services - starts w/c 16th April 2018

Dear Householder,

## Thank you!

Following the changes to your waste and recycling collections in 2015 we are now recycling 40% of Dundee's Household Waste.

## What's changing and why?

What you put into your recycling bins is changing along with how often they are collected. In line with many other Local Authorities, we are making these changes as part of our commitment to the Scottish Government's Household Recycling Charter, which aims to make waste collection systems across Scotland more consistent and achieve greater value from recycling by improving material quality.

### Blue bin

For all paper and cardboard.

### Burgundy bin

For all metals, plastics and cartons.

### Grey bin

For any household waste you can't recycle.

### Bring sites

For all glass bottles and jars.

Your food and garden collections will not change.

## What's next?

Please continue to use your bins as normal until MONDAY 16TH APRIL. You will receive an information leaflet and a letter detailing the specific collection arrangements for your property shortly before the changes are made.

If necessary we will be delivering new wheelie bins and/or eurobins and installing these either on-street or in bin stores before the new service begins.

Please continue to use your burgundy bin for mixed glass until MONDAY 16th APRIL. After this date this bin should only be used for plastics, metals and cartons, and your glass can be recycled at your nearest bring site. [www.dundee.gov.uk/service-area/neighbourhood-services/environment/bring-sites](http://www.dundee.gov.uk/service-area/neighbourhood-services/environment/bring-sites)

We are holding information sessions across the City and a list of these are on the other side of this letter.

Yours faithfully  
Dundee City Council
