

1 INTERPRETATION BOARDS (AN125-2009)

The Committee is asked to agree on the provision of interpretative panels for the Broughty Ferry Dunes area, Stannergate and Trottick Local Nature Reserve. The boards at the dunes area will include information on the animal exclusion zone and will replace the existing temporary signage. The boards at the Stannergate and Trottick LNR will give information about the Green Circular route and natural and cultural heritage features.

The Osprey Company have provided a quote of £8,948 for the design and installation of the boards, and for the slight repositioning of some of the existing boards. The Osprey Company recently designed and installed boards along the Green Circular route and at Broughty Ferry Local Nature Reserve. It is recommended that this quote is approved to maintain the design, style and high quality standard.

The total cost of this provision will be £8,948 and is to be met through Leisure and Communities Capital.
