

1 DISC - SUPPLY OF "ARTIFICIAL PITCH" SWEEPER (AN169-2002)

In order to ensure the integrity of the water and sand base pitches at DISC to the required standard for club matches, it is proposed to purchase a specialist "Sweeper". The machine can also be used to clean external footpaths.

A quotation of £7,185 has been received from specialist supplier Alpha Plus (Scotland) Ltd for a high capacity ride-on sweeping machine which is gas powered so as not to contaminate pitches. It is recommended that the quotation be accepted. The cost can be met from the Leisure and Parks Capital Budget 2002/03.
