

6 DUNDEE CENTRAL WATERFRONT - A92 TRADES LANE JUNCTION IMPROVEMENTS (AN170-2009)

Reference is made to Article VII of the City Development Committee of 8 June 2009 whereby the City Engineer was authorised to agree an appropriate form of contract and allocation of costs with Transport Scotland/BEAR Scotland Ltd for the reconstruction of Trades Lane Junction as part of a trunk road contract to be procured by Transport Scotland which includes road reconstruction work on the trunk road from Trades Lane to Greendykes Road. The Depute Chief Executive (Support Services) was also authorised to agree and enter a Minute of Agreement with Transport Scotland for the delivery and payment of this project. Transport Scotland received competitive tenders on 29 July 2009 for these works and due to the limited timescales available, approval was given by the Convener and Spokespersons of the other Groups to proceed with the Trades Lane Junction improvement works on the basis of the lowest submitted tender. The estimated total cost of the Trades Lane Junction improvement project based on the lowest submitted competitive tender is £1,376,816.06. This estimated total cost can be contained with the approved Capital Plan provision for the Dundee Central Waterfront project.

The foregoing is reported for information.
