

3 RIVERSIDE AGGREGATE RECYCLING FACILITY (AN254-2014)

This project was the first phase of a prudential borrowing scheme seeking to recycle construction aggregates, gully waste and street sweepings adjacent to the existing Riverside Recycling facilities. The first phase was to construct a 1.2 hectare hardstanding area out of recycled materials from the Dundee Waterfront works in which to store and process construction aggregates for reuse in Dundee City Council and other projects.

With the approval of the Chief Executive, an offer was negotiated with Sir Robert McAlpine through the existing Dundee Central Waterfront Contract 4 - Infrastructure, SUDS Pond and Public Open Space Contract.

Given the limited timescales available, the Chief Executive and the City Engineer, after consultation with the Convener and Spokespersons of the other Groups, accepted the offer from Sir Robert McAlpine. The contract amount was for £104,242.45 which, together with allowances of £10,000 for City Engineers professional fees and £10,757.55 for contingencies, make a total expenditure of £125,000.

The Director of Corporate Services has confirmed that these costs can be met from Prudential Borrowing.

Committee is asked to note the foregoing for information.
