**BALDOVIE RECYCLING PLANT ENTRANCE RESURFACING WORK
(AN261-2007)**

On the instruction of the Head of Waste Management, proposals have been prepared for carrying out resurfacing work at the main entrance to Baldovie Recycling Plant Entrance.

It is recommended that the City Engineer be instructed to include this work within the existing Partnership Agreement with Tayside Contracts for delivering the road maintenance and minor road works service.

Approval is therefore sought to extend the Partnering Agreement with Tayside Contracts for this resurfacing work up to a value of £31,000 including professional fees. The Depute Chief Executive (Finance) advises that the expenditure can be met from the Waste Management Capital programme 2007/2008.
