

### **3 CLATTO PARK - CLATTO BARNES - SECURITY IMPROVEMENTS (AN332-2003)**

The Department have been looking at improving the security of Clatto Barns which is located in Clatto Park, Dundee and is used as a storage facility of the Leisure and Arts Department.

A quote was received from a specialist supplier for the supply and installation of an intruder alarm system including infrared detectors and alarm monitoring system. Electroguard Security Systems are used in the vast majority of the properties within parks and where a quality service is being provided the Department would want to ensure that there is a continuity of a similar system which has proved successful. The quotation from Electroguard Security Systems, Dundee of £2,252 is recommended for acceptance.

There is an allowance for the works within the 2003/04 Leisure and Arts Capital Plan.
