

2 PLANNING AND TRANSPORTATION DEPARTMENT - ESTABLISHMENT OF ENGINEER POSTS (AN339-2005)

Reference is made to Article X of the Recess Sub-Committee of 11th July 2005 wherein two posts of Engineer, graded AP2-PO4, £16,515 - £28,632 were established to work specifically on the £57 million Central Waterfront Development Infrastructure Project and the £19 million Tay Road Bridge bearing replacement contract. Following the recruitment process however, there was a very limited response due to the temporary nature of the posts and no appointments were made. In order to ensure that the appropriate persons are appointed to these key posts, approval is now sought to establish these two posts on a permanent basis.

The financial implications of these changes amount to £65,440 in a full financial year, inclusive of employer's costs, and will be funded from professional fees charged by the City Engineer's Division.
