

ITEM No ...6.....

REPORT TO: CHILDREN AND FAMILIES SERVICES COMMITTEE – 29 OCTOBER 2018

REPORT ON: TAYSIDE CHILDREN'S SERVICES COLLABORATIVE AND TAYSIDE REGIONAL IMPROVEMENT COLLABORATIVE (TRIC) PROGRESS REPORT

REPORT BY: EXECUTIVE DIRECTOR OF CHILDREN AND FAMILIES SERVICE

REPORT NO: 343 - 2018

1.0 PURPOSE OF REPORT

1.1 This report provides a year one update on the progress made by the Tayside Children's Services Collaborative and the Tayside Regional Improvement Collaborative (TRIC) in taking forward the first joint Integrated Children's Services Plan – The Tayside Plan for Children, Young People and Families 2017-20 and Phase 1 of the TRIC plan. The summary report of progress, which is required to be submitted to the Scottish Government, outlines key areas where improvements have been made. Phase 2 of the TRIC plan has also been attached to this report as Appendix 2.

2.0 RECOMMENDATIONS

2.1 It is recommended that Committee:

- (i) notes the progress made in the past year in relation to the Tayside Plan for Children, Young People and Families 2017-2020;
- (ii) notes the Tayside Plan One Year Report 2017-18 provided in Appendix 1 and the Phase 2 TRIC Plan provided in Appendix 2;
- (iii) instructs the Executive Director to bring a progress report back to the Children and Families Services Committee in October 2019.

3.0 FINANCIAL IMPLICATIONS

3.1 There are no financial implications arising from this report for Dundee City Council. However, funding has become available for the regional collaboratives as referenced in 4.4 below.

4.0 BACKGROUND

4.1 Reference is made to the report on the progress with the Tayside Children's Services Collaborative and the establishment of the Tayside Regional Improvement Collaborative (TRIC) which was presented to Dundee City Council, Article III of the Minute of the Children and Families Services Committee of 30 October 2017 (Report no. 372/2017 refers), with the recommendation that a progress report be provided in October 2018.

4.2 The production of *The Tayside Plan for Children, Young People and Families 2017-20* ([The Tayside Plan](#)) was an important statement of aspiration and ambition for all children, young people and their families across all communities in the Tayside area. This joint Integrated Children's Services Plan (ICSP) works within the GIRFEC policy framework, aiming to improve inter-related and inter-dependent outcomes in health, wellbeing and educational attainment. The plan identified five main priority areas for our collaborative work:-

- 1 Pre-birth and Early Years;
- 2 Learning and Attainment;
- 3 Health and Well-Being;
- 4 Looked After Children, Care Leavers and Young Carers; and
- 5 Safeguarding and Child Protection.

4.3 A report on the progress that has been made during 2017-18 on the delivery of the Tayside Plan has been produced and this has been submitted as a draft to the Scottish Government (Appendix 1).

4.4 In addition to the Tayside Plan, there was a requirement to produce a separate plan which would outline in more detail the work being progressed relating to our Learning and Attainment priority. In January 2018, Phase 1 of the TRIC Plan was published (TRIC Plan [External Link](#)). Following phase one review and evaluation, the plan for Phase 2 of our collaborative work has been produced and was submitted to Education Scotland and the Scottish Government as required earlier in September (Appendix 2). It contains within it specific requests of the Scottish Government for a share of the recently made available funding to support the work of the 6 Regional Improvement Collaborative across Scotland.

5.0 PROPOSALS

5.1 Appendix 1 details the significant progress that has been made on all five priorities identified in the Tayside Plan, from the formation of five corresponding working groups reflecting the priorities to a focus on key actions. Over the year, each Priority Group (PG) has developed and started implementing their action plans. Their achievements are summarised as follows:

PG 1: Pre-Birth & Early Years

- UNICEF Baby Friendly Gold Community Award via collaboration between maternal and infant nutrition team, family nurses and health visitors;
- Work streams developed for Best Start Programme;
- Agreed Infant Feeding Assistant in hospital;
- Milestones achieved for Universal Health Visiting pathway;
- Exploratory phase for the Getting it right pre-birth and into the first year of life in Perth and Kinross completed and a transformation zone selected;
- Family Nursing Partnership extended;
- Training and Improvement programmes by AHP staff undertaken;
- Early literacy support projects being undertaken in 3 local authority areas;
- Consultation taken place to support Tayside Parenting Strategy; and
- Expansion plan delivered for 1140 hours Early Learning & Childcare.

PG 2: Learning & Attainment (TRIC)

- Four work streams progressed:
 - Learning and teaching with a focus on feedback
 - Numeracy;
 - School Leadership;
 - School Improvement;

Another two workstreams established:

- Curriculum leadership
- Building capacity for effective use of research and evidence

Update on activities from year 1 for Priority Group 2:

- Sharing of good practice linked to Pupil Equity Fund use;
- Focused input on applying effective education interventions in context
- Identified schools working collaboratively on numeracy improvement
- Schools identified the focus for Numeracy improvement work
- Identified schools working collaboratively on developing effective feedback
- Identified schools piloting approaches being developed to support whole school improvement through better self-evaluation
- Induction programme for new Head Teachers established
- Targeted leadership support programme for specific school teams

PG 3: Health & Well-Being

- Consultation completed on draft Tayside Parenting Strategy;
- Agreed approach for Pregnancy and Parenthood in Young People;
- Securing joint leads and workshop planning for Tayside Mental Health Strategy;
- Pan-Tayside engagement to launch the development of the child healthy weight strategy;
- Securing Alcohol & Drug Partnership Lead Officer for Tayside;
- Aligning policy developments with 3 Tayside Health and Social Care Partnerships;
- Development of substance misuse curriculum materials

PG 4: Looked After Children, Care Leavers, Young Carers and Youth Justice

- Development of Corporate Parenting Plans across three local authorities;
- Options appraisal carried out across 3 local authorities in relation to Looked After Children Child Plans;
- Developing a single strategy for engagement and participation of Looked After Children and Care Leavers;
- Increase in numbers of know Young Carers and support provided as a result of Young Carer Strategy developed in each authority;
- Development of shared strategies relating to accessibility, speech/language therapy and mediation; and
- Sharing of approaches to risk assessment of young people who have offended.

PG 5: Safeguarding & Child Protection

- Development of new guidance for Inter-agency Referral Discussions and Joint Paediatric Medical Examinations informed by multi-agency staff;
- Agreement that NHS Tayside consultant Paediatrician will contribute to an Initial Referral Discussion (IRD) Action Group;
- Shared learning across Tayside to support frontline practitioners to address neglect;
- Exploring opportunities to involve local young people in working alongside Abertay University on cyber safety;
- Exploring best practice in the participation and engagement of children and young people in child protection processes; Reviewed and updated guidance on the use of chronologies.

Other groups where progress has been made include:

- **Commissioning Group:** reviewing Service Level Agreements for common areas of provision: links have been made with PG4 to review advocacy provision;
- **Performance Group:** data analysts from 3 local authorities and NHS Tayside providing robust data and performance focus; and
- **Strategic Group:** newly formed to oversee delivery of the collaborative.

Trends from the core data set include:

- Early learning and child care increase across Tayside for 3 and 4 year olds;
- Evidence of the poverty related gap beginning to close for some groups of young people;
- Improvements in children's BMI, dental health and emergency admissions to hospital for unintentional injuries and;
- high levels of performance maintained for family based placements.

5.2 Going forwards, all priority groups have outlined their next steps and agree on 4 common themes:-

- Leadership;
- Workforce development;
- Shared services;
- Shared approaches.

5.3 As a result of a review of phase one, further work streams have been added to PG2 to be developed in the year ahead: Curriculum Leadership and Research and Evidence based Improvement.

6.0 POLICY IMPLICATIONS

6.1 This report has been screened for any policy implications in respect of Sustainable Development, Strategic Environmental Assessment, Anti-Poverty, Equality Impact Assessment and Risk Management. There are no major issues.

7.0 CONSULTATION

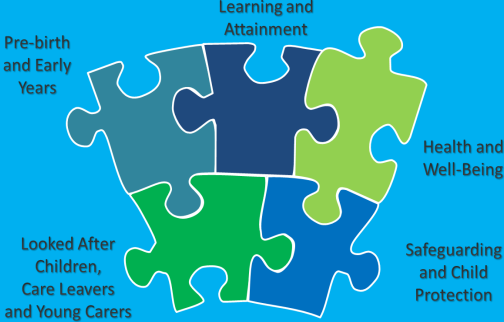

7.1 The Council Management Team have been consulted in the preparation of this report.

8.0 BACKGROUND PAPERS

8.1 The Tayside Plan for Children, Young People and Families 2017-2020.

#Taycollab

Foreword

I am pleased to present the first Annual Review of the Tayside Plan for Children, Young People and Families 2017-20. In developing the plan just 12 months ago, all partners across Tayside were keen to ensure that it set ambitious goals for our children, young people and families. We have worked within the Getting it Right for Every Child policy framework towards improving inter-related and inter-dependent outcomes in health, wellbeing and educational attainment. We have focused on 5 shared priorities which evidence indicated would assist children, young people and families most both across the region and within each local authority area. We were particularly keen to focus on prevention, involve communities in developing our approaches and reduce inequalities.

This update shows that, only one year into our implementation of the plan, partners are making clear progress in either establishing the foundations on which transformative and sustainable improvements can be achieved or they are already driving improvements across a range of indicators. I believe this has been achieved through effective leadership involving a shared partnership recognition that focusing on early identification, evidence based practice, cultural change and necessary resource shift within and between organisations and across geographical boundaries is more likely to make the greatest contribution to our shared aims in both the short and longer-term.

In this context, the update also highlights the key challenges partners have faced and will continue to face in trying to implement our plan across the region and in a climate of fiscal constraint. Equally, it shows some areas of the plan where we have not achieved comparable or sufficient improvements and which therefore require a particular focus to help drive improvements at faster pace. In doing so, we will continue to work together to learn from and adapt to information on our design and delivery of services, especially in relation to the views of our local communities. We are determined to ensure that, in another 12 months, we can again show how we are further towards achieving our vision that *'our children and young people will have the best start in life and Tayside is the best place in Scotland to grow up'*.

Margo Williamson, Chief Executive of Angus Council and Chair of Tayside Children's Services Collaborative Strategic Executive Group

1. Introduction

The Tayside Plan for Children, Young People and Families is led by the Councils of Angus, Dundee and Perth and Kinross with NHS Tayside. In partnership with Community Planning Partnerships, Health and Social Care Partnerships, Tayside Division of Police Scotland and the Third Sector, the plan was developed within a framework of policy, legislation, evidence based practice and analyses of local needs to build the collective capacity and resilience of services, share expertise, make best use of resources and accelerate progress towards improving outcomes in health, wellbeing and attainment. The plan is the first of its kind to reach across both geographic and organisational boundaries and focuses on 5 shared priorities:

In developing the plan, partners committed to a range of key principles, including the development of a culture of collaboration and a holistic focus on the family and whole child whether services are delivered at home, in school or in the wider community. We recognised that our collaboration would take a range of forms from the development of shared systems, processes and learning, through to local community engagement and participation, shared commissioning arrangements and even the full integration of some services. Either way, we were determined to ensure that we adopted a genuinely whole system approach which mobilised resources towards the same priorities and outcomes. Some key drivers included:

- **Christie Report on the Future Design and Delivery of Public Services**
- **Children and Young People (Scotland) Act 2014**
- **Scottish Attainment Challenge**
- **Carers (Scotland) Act 2016**
- **Framework for Maternity Care**
- **Improving Maternal and Infant Nutrition: A Framework for Action**

2. Tayside Collaborative Model

The Tayside Collaborative is led by a high level Strategic Group consisting of the Chief Executives of the 3 Local Authorities and NHS Tayside, a Chief Executive from the Third Sector, a Health and Social Care Partnership Chief Officer and the Tayside Regional Improvement Collaborative Lead

Director. The group provides collective leadership and is supported by a Directors Group consisting of the 3 Local Authority Executive Directors for Children and Families Services, the Director of Operations of NHS Tayside, the Director of Public Health within NHS Tayside and a Chief Inspector from Police Scotland. Reporting to the Directors Group are five Priority Groups which reflect the five areas of priority outlined in the Tayside Plan, along with Commissioning and Performance Groups.

Strategic Group
Directors Group
Priority, Commissioning and Performance Groups

Each Priority Group is led by a Senior Manager from either a Local Authority or NHS Tayside and has an identified Senior Sponsor from the Directors Group to provide constructive support and challenge to the work. The groups include relevant representatives from across the region depending on the priority focus and members are also responsible for informing and communicating developments at a local level within and between partner organisations. Locally, some partnership governance arrangements have also been retained to both ensure there is a strong connection between regional and local developments and to maintain a continued focus on local structures and priorities. An organisational chart is attached as Appendix 2.

In respect of the Commissioning and Performance Groups, the former was established to develop collaborative commissioning related to the priorities identified in the Tayside Plan. The latter was established to ensure shared approaches to gathering and reporting on key performance indicators and work on the establishment of new indicators. This group is a virtual network of representatives from each of the authority areas, each of whom are also members of the Tayside Public Health Information Network (Children’s TayPHIN) to ensure collaboration with NHS Tayside and other partnerships.

3. Progress towards achieving our priorities

The 5 priorities outlined in the plan were informed by a strategic assessment of need and are accompanied by both individual vision statements for each priority area and a set of high level intentions designed to set the parameters of specific action plans to improve outcomes. This has required significant and ongoing collaboration within and between each of the groups to ensure actions remain relevant to our priorities, that they are complimentary in relation to cross-cutting themes and to avoid duplication. In the last 12 months, all 5 Priority Groups have developed and started to implement action plans as outlined below.

Priority 1 – Our children will have the best start in life, they will be cared for and supported to learn in nurturing environments.

What we will do to ensure children get the best start in life in Tayside:

- Provide targeted multi-agency support to families to ensure children aged 0-5 years reach their developmental milestones
- Deliver a new Health Visiting Pathway and expand the Family Nurse Partnership Programme
- Realign resources to improve the availability and impact of early intervention services, including for children who have a disability or complex needs
- Deliver on the 5 ambitions of Ready to Act, the National Allied Health Professional (AHP) transformational plan
- Develop and implement an evidence-based Tayside parenting strategy in partnership with Health and Social Care and other appropriate partnerships
- Develop and deliver high quality, flexible early learning and childcare provision
- Develop ways to support speech, language and communication capacity, including inclusive communication with children, young people and parents

What we have achieved in year 1

The work of Pre-Birth and Early Years group is informed by relevant national programmes such as Best Start - Maternity and Neonatal Care, Universal Pathway for Health Visiting, Ready to Act – Allied health Professionals and the Expansion of 1140 hours of Early Learning and Child care to reflect the targets required over the next 3- 5 years on the path to full implementation. Over the past year, the

group has refined and focussed on the key areas for development within large scale transformation projects and there is now a clearer, shared focus on what actions need to be taken to improve outcomes across Tayside. With each of the main action areas, the following key achievements have been noted:

- Collaboration between maternal and infant nutrition team, family nurses and health visitors on increasing both initiation and continuation of breastfeeding has been assessed and awarded the UNICEF Baby Friendly Gold Community Award
 - Four work streams have been developed to take forward implementation of the Best Start Programme
 - Infant feeding assistant has been agreed to support women in hospital
 - The universal health visiting pathway was implemented in May 2017 and the milestones to increase and sustain the workforce has been achieved
 - A CELCIS project on addressing neglect has completed the scoping phase and has identified a transformation zone in South/West Perth and Kinross. There is an intention to scale the learning across all 3 local authority areas.
 - A Family Nurse Partnership has been extended to almost 100 women who met the criteria
 - A comprehensive range of training and improvement programmes have been undertaken by AHP staff, to build capacity, change thinking and practice and support the use of improvement methodology. A package of training and support for early years practitioners across all agencies has also been developed to support evidence based key messages on early language development with parents and carers.
 - A number of specific projects to support early literacy is being undertaken in all three local authority areas in collaboration with nurseries.
 - Comprehensive consultation has taken place to support the development of a Tayside Parenting Strategy.
 - The Tayside group of Early Years teams successfully delivered their expansion plan for the delivery of 1140 hours of Early Learning and Childcare to the Scottish Government and received confirmation of funding for implementation of the programme by 2020
 - Extension of the Family Nurse Partnership to first time mothers aged 20-24 who meet the eligibility criteria
- Whilst there are different models of delivery suited to the demographic and geographical needs of each area, the ELCC work stream is focussed on providing a consistent approach across Tayside, and is collaborating on four key areas:
- Quality Assurance
 - Workforce expansion and development
 - Partnerships including childminders
 - Policy Development

Next Steps

Greater collaboration and consistent approaches of service delivery and practice has been achieved in year 1 and this will continue to be a focus of future work.

We will develop further a consistent collation of data to support improvement, and the capacity of agencies and practitioners to use improvement methodology to demonstrate the effectiveness of interventions. This is being addressed through joint working with a data team and with the Children and Young People Improvement Collaborative advisor.

Recruitment of trained staff is a challenge for maternity services, health visiting and early years education services due to the expansion of national programmes. Workforce expansion and development programmes are in place across all areas, including Allied health Professionals who are developing new and better ways of working to ensure that they can meet the demands of an increasing need for their services.

We have identified further actions to support our work over the next year. We will;

- Build relationship based practice across the early years workforce by embedding the Solihull approach in NHS, education, children and families and third sector partners.
- Focus on a greater level of support for maternal health within maternity services
- Develop a Test of Change in the impact of a Welfare worker on the outcomes for women within the FNP programme in Perth and Kinross
- Reduce the number of women requiring to be engaged in the Unborn baby protocol
- Implement the plan for the CELCIS project to build relationship based practice and community resilience to better support pregnant women and their families
- Test model of maternity Hub in a locality area of Dundee
- Collate data on the impact of the implementation of the Universal pathway for Health Visiting on children and families to support improved outcomes
- Continue to deliver "Ready to Act" transformation programme
- Consider how to collaborate on improving early language skills in children aged 0-3, particularly those at risk of not meeting their developmental milestones
- Implement the expansion plans for the delivery of 1140 hours of ELCC across Tayside, and deepen collaboration on high quality service delivery
- Work with Education Scotland and Care Inspectorate to further develop leadership skills and capacity in self-evaluation as it relates to the ELC National Standard and Care Standards
- Assess the extent to which the expansion from 600 hours to 1140 hours has improved outcomes for children particularly those at risk of disadvantage between 2 and 5, and their parents ability to work, train or study.
- Further develop performance measures and data across all areas of activity to support evidence based practice, and to support improvement activity.

Priority 2 - Our children, young people and their families will be meaningfully engaged with learning and combined with high quality learning experiences, all children and young people will extend their potential.

What we will do to ensure children and young people succeed:

- Ensure children who are at risk of not achieving their potential are provided with the extra support they need
- Provide parents, carers and young people with opportunities to be active partners through supported learning and consultation on improvement plans
- Implement initiatives for post-school training, apprenticeships and further and higher education to improve pathways to employment
- Promote collaborative working across schools and their communities to support robust self-evaluation, and improved quality of provisions
- Support young people to make informed choices and exercise greater control as they transition to adulthood
- Ensure close partnership working is designed to close inequality gaps, address complex needs and share good practice that already exists

What we have achieved in year 1

Over the first year of the plan, the group has focused on building the foundations for effective collaboration to improve learning experiences and educational outcomes across Tayside. In January 2018, the requirement to develop a Regional Improvement Collaborative (RIC) Plan focused on closing the attainment gap and raising achievement for all also provided an opportunity to refine the approach. The group identified four work streams that would benefit from collaboration. These work streams were drawn from an analysis of school improvement plans and agreed within a wider leadership forum of educational leaders. The four work streams are:

1. **Learning and teaching with an initial focus on feedback**
2. **Numeracy**
3. **Leadership**
4. **School improvement**

On the basis of ongoing evaluation, a fifth work stream has been identified on the topic of Curriculum Leadership and further work streams will be agreed for year 2 of the plan following a further analysis of school improvement plans from across the region. Some key developments within and between local authority areas have also involved:

- Sharing information about the effective use of Pupil Equity Funding including extended input to school leaders about evidence based educational interventions
- Developing joint approaches towards engagement and participation, including opportunities for carers and children to be active partners through supported learning and consultation on school improvement plans
- Angus and Dundee are working together to further implement an innovative approach to the senior phase called Future Skills College (FSC) along with Dundee and Angus College.
- A consistent approach to school leadership development is being rolled out. This includes an effective induction programme for new head teachers and comprehensive school leadership support within and across schools.
- A small number of schools will receive intensive cross-authority support in order to support the leadership of improvement and a universal approach to improving school collaboration through a strengths directory
- Consideration of increased multi-agency self-evaluation using new inspection information when that becomes available. This builds on the collaborative approaches to improvement already trialled across the collaborative.
- Informed by Priority Group 3, the development of curriculum materials on the topic of substance misuse is in process. This will add to our successful collaborative resource on sexual health, relationships and parenthood.
- An established network of professionals to review and plan multiagency supports for children and young people with complex needs and close inequality gaps.

Next Steps

As well as evaluating year one of the Tayside Plan, PG2 are preparing phase 2 of the TRIC. The number of workstreams are anticipated to grow having taken account of school improvement planning for session 2018/19 and an ongoing consideration of national requirements. Individual workstream plans have been developed by a cross section of practitioners from across the region with the facilitation of a lead officer. As each workstream has developed a detailed action plan, the scope and extent of project reach has been assessed. The school improvement theme for example includes both a universal school offer as well as targeted support for identified schools as does the numeracy sub-theme.

A feedback project is a deeper piece of work starting off with 6 schools from across the region and developed in partnership with an external provider and the GTCS. The leadership theme will impact on middle leaders and new Head Teachers from August 2018. Additional themes will be explored for the coming session bearing in mind that existing collaboration is already very successful in the area of modern languages 1 & 2 and collaborative work on literacy is emerging. The focus is therefore now on implementation and evaluation in order to assess whether the intervention should be rolled out.

Each work stream has specified their interventions and associated performance measures. Overall education performance measures are outlined in the Performance Information of year one (Appendix 2). This will have a continued focus in year 2 of the plan and support has been accessed from Education Scotland and the Scottish Government's Improvement Advisor. Performance leads from each local authority and the NHS are working in partnership to develop a collaborative baseline of data that can be used year on year to assess progress.

Continued focus on communicating the work of the collaborative will be supported by the establishment of a website to enhance the face to face and written updates as well as extend the reach of key messages. The priority group will also plan and assess focused interventions for looked after young people in response to the provision of national resource.

All aspects of the work of priority group 2 is built upon collaboration. The very good working practices that had been developed through shared work on school improvement has contributed to the fast

progress of work between January and June 2018. It is anticipated that the pace of this work will increase as consideration is given to additional areas of collaboration and ensuring the impact of those already in train. It is likely that our focus will evolve into the development of shared services or lead authorities for specific functions.

Priority 3 - Our children and young people will be physically, mentally and emotionally healthy.

What we will do to promote good physical, mental and emotional health for children:

- Develop and implement a Tayside multi-agency framework to prevent and address early initiation into substance misuse
- Develop and implement a Tayside Mental Health Strategy for children and young people to ensure a focus on prevention, early identification and support
- Implement the Pregnancy and Parenthood in Young People Strategy (PPYP) alongside work to reduce teenage pregnancy and support to young parents
- Develop a Tayside strategy to improve Child Healthy Weight
- Develop and implement, in partnership, an evidence based Tayside parenting strategy

What we have achieved in year 1

In the past 12 months, a well functioning Tayside Health & Wellbeing Priority Group (HWPG) has been established and the group has an engaged and committed membership from across the 3 Local Authorities, the Third Sector and NHS Tayside. Achievements towards delivering on the HWPG actions include:

- Production of a draft Tayside Parenting strategy which has recently completed consultation processes with practitioners and families
- An agreed Tayside partnership approach to implementing the national PPYP strategy
- Securing joint leads from NHS Tayside and a Local Authority to drive the Tayside mental health strategy and a planning workshop with stakeholders
- Planning of a pan-Tayside child healthy weight event for practitioners, leaders and community members to co-produce a child healthy weight strategy
- Securing Tayside's joint Alcohol & Drug Partnership (ADP) Lead Officer as lead for the Substance Use Prevention framework Task & Finish group
- Direct involvement and support from the Scottish Government (CYPIC) national improvement adviser to all 5 areas for action for the Tayside HWPG
- Relationships developing with the 3 Tayside Health and Social Care Partnerships to ensure policy developments are aligned.

Moving forward, the Tayside HWPG will continue to lead and support the work of the multi-agency Task & Finish Groups and key individual leads, in order to achieve strategy development and implementation within the identified timescales. In addition, members will be reviewing existing outcomes measures within the Tayside Plan, commencing with a dental health measure and identifying relevant refined and/or additional measures. This work will be undertaken in conjunction with Tayside Plan Performance Group members.

The HWPG will also be developing links and working with the Tayside Plan Commissioning Group members to both inform and be informed on future commissioning activity related to the new health and wellbeing strategies being developed.

Priority 4 - Our children and young people who experience particular inequalities and disadvantage will achieve health, wellbeing and educational outcomes comparable with all other children and young people.

- Informed by the work of Fairness Commissions, work together to reduce the impact of poverty on our children, young people and families.
- Develop and implement a Corporate Parenting Strategy which pro-actively and systematically addresses the needs of Looked After Children and Care Leavers
- Ensure Looked After Children and Care Leavers are fully involved in decisions about their care and influence service delivery
- Ensure Young Carers are identified, provided with support, and assisted to manage appropriate caring responsibilities
- Ensure children and young people with complex and enduring needs experience high quality care and support and are included within their local communities
- Ensure children and young people with complex and enduring needs receive timely, effective support in their transition into adulthood
- Ensure that children and young people who have offended receive appropriate child-centred support which reduces the risk of re-offending

What we have achieved in year 1

Corporate Parenting

In the last 12 months, partners in the 3 Local Authority areas have developed Corporate Parenting Plans designed to promote the 8 outcomes for Looked After Children and Care Leavers outlined in the Children and Young People (Scotland) Act 2014. In addition to general health and wellbeing, this includes a focus on required improvements in school attendance, exclusions, attainment and positive destinations. Building on this, partners have also informed the provision of additional Scottish Government funding to build capacity for looked after and care experienced children and are presently collaborating to target this at areas of greatest need.

In order to improve permanence planning processes, a joint family placement quality assurance post was established between Angus and Dundee. Building on this, all 3 local authority areas jointly carried out an options appraisal on approaches towards developing and reviewing effective Child's Plan's for all Looked After Children. Options being considered include the development of a single regional service or the development of a consistent approach across the area, the outcome of which will progressed over the next 12 months.

Partners are also developing a single strategy for engagement and participation with Looked After Children and Care Leavers. The parameters of the strategy have been agreed and will include the shared development of approaches which reflect the age, stage of development and interests of individual and/or groups of children and young people. Crucially, the strategy will involve mechanisms to ensure that their views are systematically obtained and routinely inform both day-to-day practice and the longer-term design, delivery and development of services.

Young Carers

Each Local Authority area has now developed a Carers Strategy which outline processes to improve the identification, assessment and support of Young Carers. This is already starting to lead to increases in the numbers of known Young Carers and the provision of support which ranges from advice and guidance to more intensive packages where this is required. Going forwards, partners have committed to the development of a shared performance framework and a shared approach towards short-breaks.

Complex and Enduring Needs

In the last 12 months, partners have coordinated the development of a number of shared strategies relating to accessibility, speech and language therapy and mediation. This work has had a particular focus on improving the inclusion of children and young people and over the next 12 months will be

supported by associated training and workforce development. Going forwards, partners have also committed to the development of a single autism strategy.

Young People Who Have Offended

Partners work in this area has initially focused on the development of shared approaches towards risk assessment through the regional use of the same tool and joint workforce development. This includes both generic risk assessments and assessments of those young people who have been identified as being at risk of causing significant harm. Going forwards, partners have committed to a consistent approach towards Early and Effective Identification and Diversion from Prosecution processes and responding to specific crime trends or associated issues, such as internet crime and substance misuse.

Next Steps

Collectively, these actions appear to be contributing towards some reductions in inequalities in these priority groups. There have been marked improvements in the number of school exclusions across all 3 Local Authority areas. However, as our performance framework illustrates, partners still need to consistently focus on improving attainment levels and positive destinations of care experienced children and young people in particular. Over the next 12 months, our priorities will therefore involve:

- Targeted use of additional funding for Looked After Children and Care Leavers
- Implementation, monitoring and review of an agreed approach towards the quality assurance of looked after and care experienced children and young people's plans
- The development and implementation of a shared engagement and participation strategy
- The development of a shared approach towards short-breaks and a performance framework relating to Young Carers
- A shared focus on the inclusion of children and young people with complex and enduring needs and an autism strategy
- Consistent approaches towards risk assessments, prevention/early intervention and priority crimes for young people who have offended

Priority 5 - Our children and young people will be safe and protected from harm at home, school and in the community.

What we will do to keep children safe:

- Continue to build a confident, competent and supported workforce in order to protect children and young people from abuse, exploitation and neglect
- Continue to promote highly effective practices in the sharing of information in order to protect and safeguard children, young people and vulnerable adults
- In partnership with the Centre for Excellence for Looked After Children in Scotland (CELCIS), strengthen our approaches to tackling and mitigating the effects of childhood neglect
- Improve children and young people's capacity for personal safety and the avoidance of abuse and exploitation, including from their use of the internet
- Develop a shared Tayside communication strategy in support of consistent messages to promote the protection and welfare of children and young people
- Involve children, young people, parents and wider families in decision-making and planning processes that affect them

What we have achieved in year 1

Priority 5 - Our children and young people will be safe and protected from abuse at home, school and in the community

Building on a history of collaboration in child protection, Priority Group 5 has identified opportunities to add further value by focusing on a number of common key areas which already featured within Child Protection Committee improvement plans. Initially, this has involved focusing on incremental improvements to achieve consistent high quality practices across the collaborative. It is envisaged that this will provide a more solid foundation for larger scale change and move towards greater

sharing of resources and integrated models of delivery over the life-time of the plan. A delivery plan is supported by Action Groups with representation sufficient to implement improvement across agencies forming the collaborative and a clear remit to achieve step change in key areas which are notoriously complex and problematic both locally and nationally. Taking time to connect through regular meetings and developing shared understandings of similarities or variations is building stronger partnership working. The groups also systematically monitor progress to identify and address barriers.

What we have achieved:

A new suite of guidance is being developed and will be in place by the end of December 2018. The group has recognised that this requires more than the production of written guidance and that there needs to be culture and practice change. Multi-agency staff groups across Tayside are informing the new guidance, practice direction and associated workforce development

A Consultant Paediatrician from NHS Tayside will contribute to an Initial Referral Discussion (IRD) Action Group. They will lead on the revision of a Tayside Protocol for conducting Joint Paediatric Forensic Medical Examinations ensuring that the planned improvements for IRDs and all new guidance will dovetail and ensure robust decision-making for medical assessment/examination

Shared learning in relation to 3 projects in each local authority to address neglect. This work is being carried out with CELCIS and other partners in Dundee and Perth and Kinross. In Angus, it involves a partnership approach towards the implementation of a Graded Care Profile. In November 2018, a learning event on 'Connect with Neglect' will be held. Other shared learning has included issues identified and action plans developed from Initial and Significant Case Reviews

Exploring opportunities to involve local children and young people in developing cyber security; personal safety; and CSE awareness, including the potential to work with experts at Abertay University. An initial mapping and scoping exercise about current programmes aimed at keeping children safe online has been carried out by 3rd sector colleagues and extends to FE colleges. The 3 CPCs jointly responded to a Scottish Government/CELCIS/Care Inspectorate consultation on a shared national dataset. This will build on local datasets and inform the development of new performance measures over the next 12 months. It will also provide a meaningful framework within which to consistently demonstrate progress in accordance with a new Care Inspectorate framework for Child Protection and Looked After Children inspections.

A Tayside Chronology Action Group includes education and social work representatives across all three local authorities and is on target to produce revised guidance by October 2018. Once approved by respective CPCs, this will be implemented thereafter via a Tayside-wide multi-agency workforce learning development plan.

A Tayside Child Protection Learning and Development Group Work Plan 2018 – 2020 was published in June 2018 and includes Tayside Inter-Agency Learning and Development for IRDs, Chronologies and the Shared Learning Event: Connect with Neglect. Regular Joint Meetings planned for Tayside Child Protection Lead Officers and Learning and Development Officer to ensure plan is resourced and implemented.

Next Steps:

There will be a review of the priority group 5 delivery plan before the end of 2018 and a focus on ensuring that the work is moving towards greater sharing of resources and integrated models of delivery.

Commissioning Group

The work of this group is involving reviewing existing Service Level Agreements for common areas of provision, identifying future need and engaging with established working groups supporting the Tayside Plan. In the last 12 months, this has started with a review of advocacy provision for which the group is linking with Priority Group 4.

Performance Group

This group is made up of Data Analysts from across the 3 Local Authorities and NHS Tayside, who already work together on data and performance information for a range of other Local Authority and Health Board plans. The group meets regularly with Priority Group chairs to facilitate a robust and consistent data and performance focus within the individual Priority Groups. Data analyst group members will work with individual Priority Groups to review and refine outcome measure for year 2 of the plan.

What does our Performance Information tell us?

In developing the Tayside Plan, we recognised the importance of ensuring we have shared and robust performance indicators. We therefore developed an initial performance framework which we believed would provide some indication of progress or barriers to progress in each priority area. Going forwards, we are continuing to work together to further develop and refine the framework, including in respect of qualitative measures. We want to ensure that the framework promotes a better understanding of the impact of our services and informs what we do more of or less of or differently. For this year, our core data set highlights the following trends:

- ✓ An increase in the uptake of early learning and child care for vulnerable 2 year olds (Dundee and Angus) and 3 and 4 year olds across the area
- ✓ Improvements in learning and attainment with data showing that there are areas where we have maintained our position and areas of improvement
- ✓ Some positive improvements in some areas for children's BMI, dental health and emergency admissions to hospital from unintentional injuries;
- ✓ Maintaining high levels of performance for children placed in family based placements.

In general, trends in relation to outcomes for Looked After Children are improving but they are also subject to annual fluctuations and are still not comparable with their peers across a range of indicators. We recognise that they need to both accelerate and be sustained and this will continue to be one of our key priorities over the next 12 months. The current data set will be influenced by the work taking place nationally on a core data set for child protection committees and a core data set for Looked After Children. We will incorporate this into our work and include other measures as each of the priority groups mature.

4. Conclusions and Next steps

In the first year of the Tayside Plan, partners have created an infrastructure to support the transformative changes needed to deliver on our Tayside commitments. Our assessment is that each of the groups are now in a clear position with strong and effective leadership and guidance to drive forward our work. National developments relating to the Regional Improvement Collaborative have served to strengthen significantly the work and direction of Priority Group 2. Building on this, the next steps described by each of our Priority Groups outlines how, over the next 12 months, our work will be shaped around 4 common themes:

Leadership – continuing to promote a whole systems model of collaborative leadership crossing geographical and organisational boundaries, including in relation to schools. The approach will involve a shared holistic focus on improving inter-dependent health, wellbeing and attainment outcomes for children and young people.

Workforce development - committing to children's services and local communities as one system and taking opportunities to share how we ensure our workforce are ready and prepared to identify, support and where necessary protect our children and young people.

Shared services – assessing areas to identify where sharing resources across 2-3 community planning areas will promote best value and contribute towards improving outcomes for children and young people. This will also apply to commissioned services.

Shared approaches – taking shared approaches to our work including shared policy and practice, engagement and participation and self-evaluation to make best use of our resources, involve communities in developments and promote consistently high levels of practice across Tayside.

The review of advocacy services being jointly progressed by Priority Group 4 and the Commissioning Group will have a particular focus on children's rights. It will be accompanied by the development of a shared engagement and participation strategy which promotes different methods of involvement dependent upon age, stage and individual needs. We will also work with partners involved in our Fairness Commissions to develop or refine actions designed to specifically address child poverty across the region. We recognise that, although demographically varied, high levels of urban and rural poverty are experienced in each local authority area.

The foundations for continued collaboration and improved outcomes across the region in accordance with the principles of Getting it Right for Every Child policy framework and other legislative and policy drivers have been strengthened. Over the second year of the plan, as key areas of work being progressed by the Priority Groups comes to fruition, we should see further improvements in the key performance indicators outlined in our performance framework. We will also further develop and refine the framework to improve our understanding of the impact of services and help illustrate both progress and barriers more effectively.

Appendix 1 – Performance Framework.

Please note that whilst the previous year's figures are generally shown for comparison, a longer time series of information is required to establish any trends in performance/outcomes.

1. Our children will have the best start in life, they will be cared for and supported to learn in nurturing environments

Indicator	Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Increase the % of children reaching all of their developmental milestones at the time of their 27-30 months Child Health Review to at least 85%		Not reported as this year as seen a change in a recording a new domain – figures are not comparable. Alternative indicator used below		
Reduce the % of children with at least one developmental concern recorded at 27-30 months Child Health Review		21% (21%)	22% (21%)	19% (19%)
Increase the % of children with no speech, language and communication concerns identified at 27-30 months Child Health Review		80% (82%)	81% (82%)	82% (83%)
Increase the % of 2 year olds children who have accessed early learning and childcare provision		TBC	22%	10%
Maintain the % of 3 and 4 year old children who have accessed early learning and childcare provision		TBC	93% (99%)	97% (93%)

2. Our children, young people and their families will be meaningfully engaged with learning and combined with high quality learning experiences all children and young people will fulfil their potential

Indicator	Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Increase the % of local residents satisfied with schools		76% (76%)	67% (65%)	83% (85%)
Increase the % of secondary school pupils achieving 5 plus awards at SCQF level 5 or higher		60% (58%)	54% (52%)	63% (62%)
Increase the % of secondary school pupils achieving 5 plus awards at SCQF level 6 or higher		32% (32%)	26% (27%)	36% (36%)
Increase the % of secondary school pupils from SIMD Q1 achieving 5 plus awards at SCQF level 5 or higher		46% (39%)	37% (37%)	31% (32%)
Increase the % of secondary school pupils from SIMD Q1 achieving 5 plus awards at SCQF level 6 or higher		18% (18%)	11% (13%)	10% (8%)
Increase the % of school leavers achieving literacy and numeracy at SCQF level 4 or above		90% (91%)	86% (86%)	86% (84%)
Increase the % of school leavers achieving literacy and numeracy at SCQF level 5 or above		72% (66%)	59% (54%)	60% (62%)
Increase the % of pupils entering positive destinations after leaving school		94% (94%)	94% (94%)	95% (92%)
Average total tariff SIMD Quintile 1		673 (602)	542 (529)	558 (523)
Average total tariff SIMD Quintile 2		615 (646)	713 (689)	657 (746)
Average total tariff SIMD Quintile 3		877 (760)	859 (869)	1028 (850)

Indicator Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Average total tariff SIMD Quintile 4	813 (914)	939 (916)	951 (1023)
Average total tariff SIMD Quintile 5	1008 (982)	1103 (1086)	1124 (1135)
Increase the % of pupils who stay on from S4 to S5	83% (80%)	76% (76%)	85% (86%)
Increase the % of pupils who stay on from S4 to S6	51% (52%)	59% (59%)	55% (60%)

3. Our children and young people are physically, mentally and emotionally healthy

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Increase the % of children with a BMI in a healthy weight (clinical) category at P1 review	84% (86%)	85% (83%)	79% (84%)
Reduce the rate per 1,000 of teenagers conceiving (under 20 years)	31 (29)	52 (51)	24 (30)
Increase the % of P7 pupils with no obvious dental disease	81% (67%)	74% (65%)	83% (74%)
Reduce the number of households with children or pregnant women in temporary accommodation, per 10,000 households	0.9 (1.9)	9.1 (8.5)	3.1 (6.7)
Reduce the number of children in temporary accommodation per 10,000	7 (14)	67 (53)	18 (34)

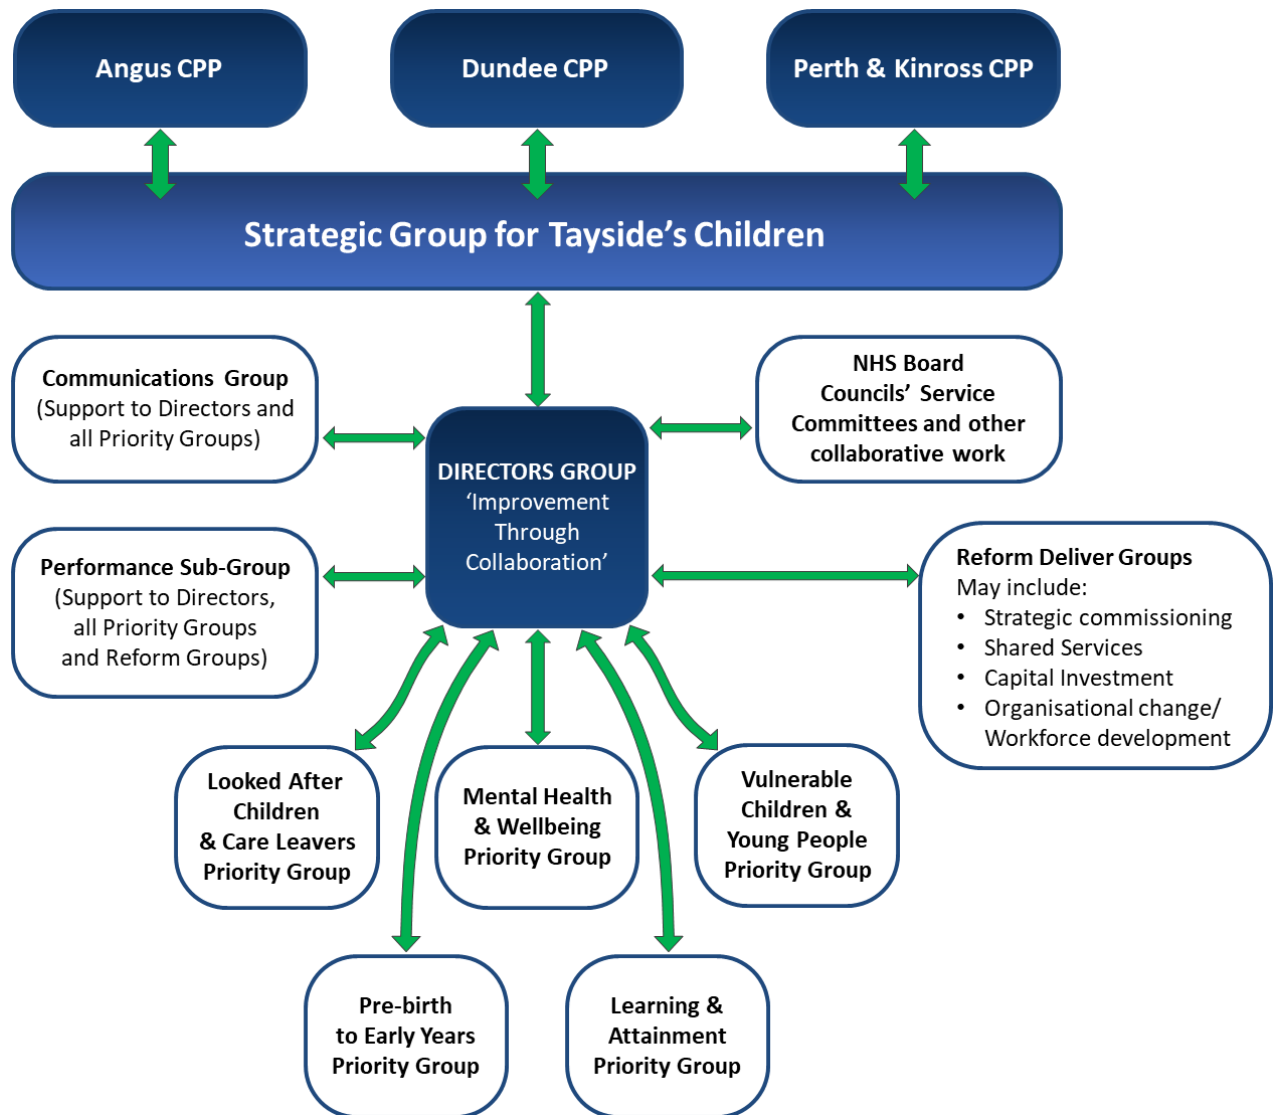

4. Our children and young people who experience particular inequalities and disadvantage will achieve health, wellbeing and educational outcomes comparable to all other children and young people

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Increase the % of children and young people placed in family based placements	92% (91%)	89% (90%)	92% (94%)
Reduce the % of openings lost to exclusions during academic year for looked after children		0.23% (0.39%)	0.21% (0.34%)
Increase the % of looked after children in positive destinations post school	79% (70%)	84% (85%)	82% (83%)
Increase the % of looked after school leavers gaining Literacy & numeracy at SCQF level 4 or better	46% (44%)	40% (58%)	71% (48%)

5. Our children and young people are safe and protected from harm at home, school and in the community

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross
Emergency admissions from Unintentional Injuries for children aged 0-15	145 (154)	213 (229)	140 (202)

Appendix 2 - Tayside Children's Services Collaborative Infrastructure

Appendix 3 - Priority Group (PG) Membership

PG1 Pre Birth and Early Years (0-5)

Head of Education: Early Years and Primary, Perth and Kinross Council (Chair)
Chief Midwife, NHS Tayside
Consultation Neonatologist, NHS Tayside
Lead Nurse Early Years, NHS Tayside
Lead Nurse/Service Manager Children and Young People, NHS Tayside
Allied Health Professional Lead, NHS Tayside
TSI representative, Dundee TSI
Education Manager Early Years, Dundee City Council
Education Officer, Angus Council
CELCIS project officers, Perth and Kinross Children and Families and NHS Tayside.

PG2 Learning and Attainment

Chief Education Officer, Angus Council
Chief Education Officer, Dundee
Head of Service: Early Years and Primary, Perth and Kinross Council
Head of Service, Secondary Education, Perth and Kinross Council
SLSO Angus
Education Officer, Dundee
2 x Quality Improvement Officer Perth and Kinross Council
RLO Education Scotland

PG3 Health & Wellbeing

NHS Tayside Programme Lead Children & Families - CHAIR
Service Manager Perth & Kinross Third Sector Interface
Education Officer Dundee City Council (DCC)
Senior Manager (SWD) DCC
Service Manager, Evidence 2 Success, Perth & Kinross Council (PKC)
Quality Improvement Officer PKC
Service Manager ASN/Educational Psychology Angus Council (AC)
Lead Officer Tayside ADPs AC
NHS Tayside Clinical Services Manager (Paediatrics/CAMHS)
NHS Tayside Child Health O.T. Service Manager (AHPs)
NHS Tayside Interim Service Manager Children & Families (Angus)
NHS Tayside Public Health Dept. - Consultant in PH medicine/Portfolio Lead Children & Young People
NHS Tayside Public Health Dept. - Executive Lead Sexual Health & BBV
NHS Tayside Public Health Dept. – Dietetic Consultant PH nutrition
NHS Tayside Clinical Lead CAMHS
NHS Tayside Consultant Clinical Psychologist (CAMHS)
NHS Tayside Community Paediatrician

PG4 – Inequalities

Service Manager, Children and Families Strategy and Performance, Dundee City Council – Chair
Senior Manager, Residential Services, Dundee City Council
Education Manager, Dundee City Council
Senior Manager, Children and Families, Perth and Kinross Council
Service Leader, Children, Families and Justice Service, Angus Council
Service Manager, Angus, Third Sector Interface
Service Manager, Carers Centre, Dundee
Locality Reporter Manager, Scottish Children's Reporter Administration
Chief Inspector, Police Scotland
Senior Manager, NHS Tayside

Community Paediatrician, NHS Tayside

PG5 – Child Protection

Detective Inspector, Police Scotland
Detective Chief Inspector, Police Scotland
Assistant Director, Barnardo's Scotland
Lead Nurse Child Protection, NHS Tayside
Consultant Paediatrician, NHS Tayside
Third Sector Strategic Officer for Children's Services, Voluntary Action Angus
Independent Chair Angus
Team Leader, Protecting People Partnership
Lead Officer
Independent Chair Dundee
Child Protection Inter-Agency Coordinator
Depute Director, Education and Children's Services / CSWO
Independent Chair

Strategic Commissioning group

The group has representatives from each of the 3 local authorities, Third Sector Interface and NHS Tayside.

IMPROVEMENT COLLABORATIVE PLAN (PHASE 2) 2018

"Our children and young people will have
the best start in life and Tayside will be
the best place in Scotland to grow up"

CHAPTER EIGHT – Workforce Plan to Support Delivery	51
APPENDICES	62

Phase one of the Tayside Regional Improvement Collaborative Plan was published in January 2018 with the support of the Strategic Group and the political leaders in each area. Phase two of this plan builds upon the success of phase one and will continue to evolve according to further analysis of data, plans, staff views and the views of partners and any further agreed guidance or legislation.

EXECUTIVE SUMMARY

Overview

- The Tayside Children's Services Collaborative is led by the Councils of Angus, Dundee City, and Perth & Kinross, with NHS Tayside. We work closely with our Community Planning Partnerships, engaging with the third sector, Police Scotland and other key partners.
- Whilst across Tayside we are making progress in our respective areas, evidence continues to suggest that there is more we can do. This desire to drive that improvement led to the development of our Tayside Collaborative.
- The clear focus of our Collaborative is to secure improved outcomes for all of Tayside's children and young people. It also reflects a commitment to the national approach, 'Getting it Right for Every Child', (GIRFEC), addressing the 'whole system' to improve outcomes and tackle inequality.
- A more formal 'Strategic Framework for Collaboration' has been established to create a clear process for this work and to ensure it retains a focus on tackling areas that will have the most impact on outcomes. As part of this, the Collaborative will:
 - Build the collective capacity and resilience of services.
 - Strengthen the approach to sharing expertise and providing challenge.
 - Reduce duplication of effort and ensure the best use of available resources.
- The work of the Collaborative is very much driven by evidence (national and local), and by the needs of communities across Tayside.
- At the heart of the work of the Collaborative is the shared Integrated Children's Services Plan (ICSP), the first of its kind which reaches across local authority boundaries and which was developed with our Health Board partners in NHS Tayside. The ICSP, itself developed in collaboration, illustrates the shared commitment and agreed priorities for strengthening families and improving the long-term life chances of all Tayside's children and young people.
- We recognise that the accountability for improvement remains with the local authorities as part of the regional collaborative and our duties to secure better outcomes for our poorest and most vulnerable children remain our focus. To add value best to what we do, we will use our collected and extended evidence to challenge ourselves and each other while maintaining local flexibility on planning and quality assurance.

Achievements to Date

The Collaborative has agreed a shared vision for securing better outcomes for children, as follows:

‘Our children and young people will have the best start in life and Tayside will be the best place in Scotland to grow up.’

This vision is supported by the development of a more formal ‘Strategic Framework for Collaboration’ in order to focus efforts and support prioritisation. This is an ambitious agenda so it was important to be clear at the outset what the Collaborative wanted to achieve and to reach a shared agreement as to how they wanted to work together.

As part of this framework, a number of guiding principles have been agreed. These define the approach and illustrate what is important to the Collaborative and how we work together. The establishment of principles also provided a clear mechanism to embed improved outcomes for children as the key driver for collaboration at the outset. These guiding principles match with those agreed nationally in the report of the Joint Steering Group.

As mentioned earlier, at the heart of this framework is the first ever Tayside-wide Integrated Children’s Services Plan (ICSP). It is the priorities identified within this Plan that are driving collaborative efforts. This plan was developed in Spring 2017 and reviewed in 2018.

These shared priorities focus on areas where, collectively, the Collaborative can have the most impact on the lives and longer-term life chances of Tayside’s children. The five sets of priorities can be summarised under the following broad headings:

- 1. Pre-birth and Early Years**
- 2. Learning and Attainment**
- 3. Health and Well-Being**
- 4. Looked After Children, Care Leavers and Young Carers**
- 5. Safeguarding and Child Protection**

The framework also includes a set of delivery mechanisms which have been designed to deliver on the priorities of the Collaborative. Five priority groups have been established, each with its own action plan.

Five lead officials supported by strategic sponsors have been driving forward collaboration in these priority areas with pace of progress enhanced since the publication of the phase one of the Tayside Regional Improvement Collaborative (TRIC) Plan in January 2018.

The second set of priorities around ‘learning and attainment’ include a key priority to secure improvement in the education system. We are clear about the need to secure improvement in education outcomes, recognising the need to address attainment and inequality. Increased involvement of practitioners. Four workstreams within priority group 2 – the Tayside Learning and Attainment Group (TLAG) - were originally identified in this area following collective self-evaluation and practitioners at all levels are now engaged in these areas. Two further areas of priority have been agreed as part of the review of progress of phase one of the plan.

New governance arrangements have also been developed to support the framework, including a new Strategic Group to oversee the delivery of the Collaborative. These governance arrangements are proving effective in supporting and challenging collaboration within and across priority areas.

All the work of the Collaborative is driven by achieving improvement on the five priorities of the ICSP.

The Collaborative recognise the scale of ambition and that this is complex and challenging work, but we are clear that it is essential if we are to secure change.

Flexibility and innovation are crucial to the Collaborative and there is recognition of the need to change ways of working in order to deliver on these commitments. This will mean that each core organisation of the Collaborative will need to support their people to work differently and to create not only the capacity within teams, but to foster a 'culture of collaboration'. Work is underway to plan an event for all members of priority groups to further enhance understanding of effective collaboration. Priority group leads meet regularly to share progress and evaluate the impact of the ICSP.

Communication of key messages has been essential to the progress of the collaboration so far with face to face updates to key stakeholders being enhanced by news bulletins and the development of a website. Two Tayside events for school leaders have been held to share practice and enhance understanding of planning contextual implementation of evidence-based practice.

The recent appointment of a TRIC officer will further enhance and support the work of the priority groups and ensure effective methodologies for planning, monitoring and communication.

Inevitably, this work will highlight the need for difficult decisions to be made at different stages throughout the process. It will be important to consider how decisions are made and our approach to dispute resolution. The governance structure provides the framework within any such disputes would be resolved, seeking always to find a solution at the earliest opportunity.

CHAPTER ONE - Introduction

The Background to Collaboration in Tayside

Phase one of the TRIC summarised public sector reform, the evolving national context and the influence of these on developing effective cross-organisation collaboration in Tayside. This context continues to provide the foundations for regional collaboration involving Angus, Dundee and Perth and Kinross Councils, NHS Tayside and our partners. Close working continues with our Community Planning Partnerships, engaging with the third sector, Police Scotland and other key partners.

We are building on a history of working together in partnership. Whilst we were all making progress in our respective areas, evidence suggested there was more we could do. There was therefore a shared ambition from all partners to do more. There was also a clear desire that this collaboration should be different from the previous regional structure that had operated in Tayside and also that it should go beyond ad hoc partnership work.

Our strong desire to drive improvement and to accelerate progress led to the development of the Children's Services Collaborative, with a shared ambition to transform services to secure better outcomes for children, young people and their families.

In practice, our collaboration to date has ranged from:

- Informal networks and alliances where colleagues decide to work together to share practice and ideas on specific issues;
- Working in partnership to deliver specific projects or initiatives.

In addition we are beginning to explore the possibility of models which can result in the full integration of services.

Our approach to collaboration continues to be rooted in our analysis of research and as such includes the following features:

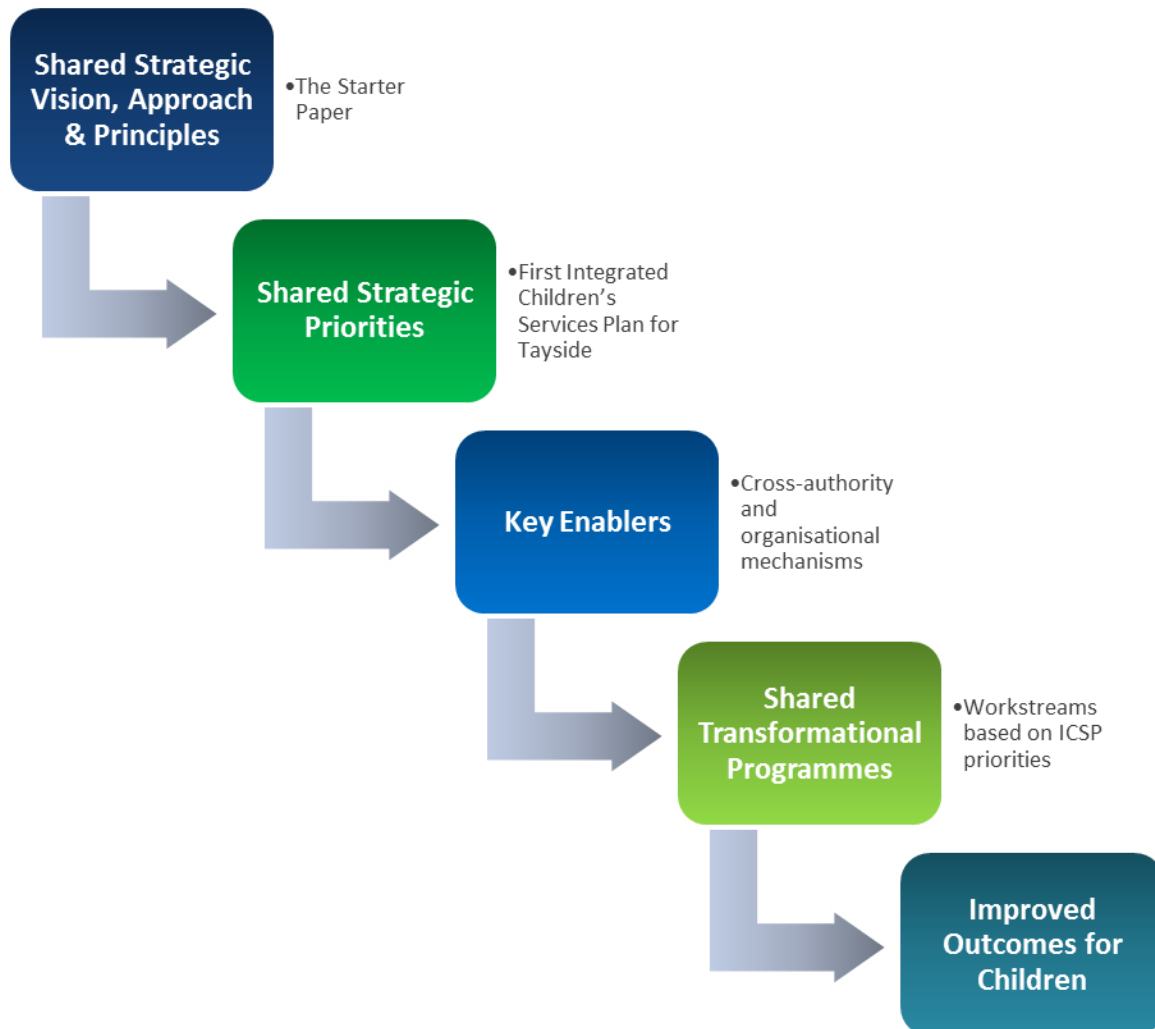

- Clear focus on outcomes.
- Clearly articulated shared purpose.
- Transparency, trust and honesty.
- Commitment to and capacity for peer review.
- Commitment to continuously improving practice and systems over the long term.
- A plan to move from collaboration to co-responsibility or a position of shared professional accountability.
- Engagement in the wider context and 'communities of interest'.
- Driven by scrutiny and support from others, on a local, regional and national level.

Our phase one plan illustrated our steps to regional collaboration which were built on our experience and shared ambition. It summarised the key decisions and stages of developing collaboration in Tayside. This started with defining our vision and highlighted the principles and the range of ways in which we would develop our collaboration. Between January and September 2018 we have delivered on our intention to develop increased collaborative practice whilst ensuring that we maintain focus and accountability. Our phase two plan takes stock of this progress and outlines our further agreed improvement activity.

CHAPTER TWO – The Strategic Framework

A Step by Step Delivery of the Model

Our approach continues as it started, with a focus on Intergrated Children’s Services Planning ensuring a holistic and partnership approach to improving outcomes for children and their families. The overarching Strategic Framework for the Collaborative is shown in the following diagram.

Our Five Priorities

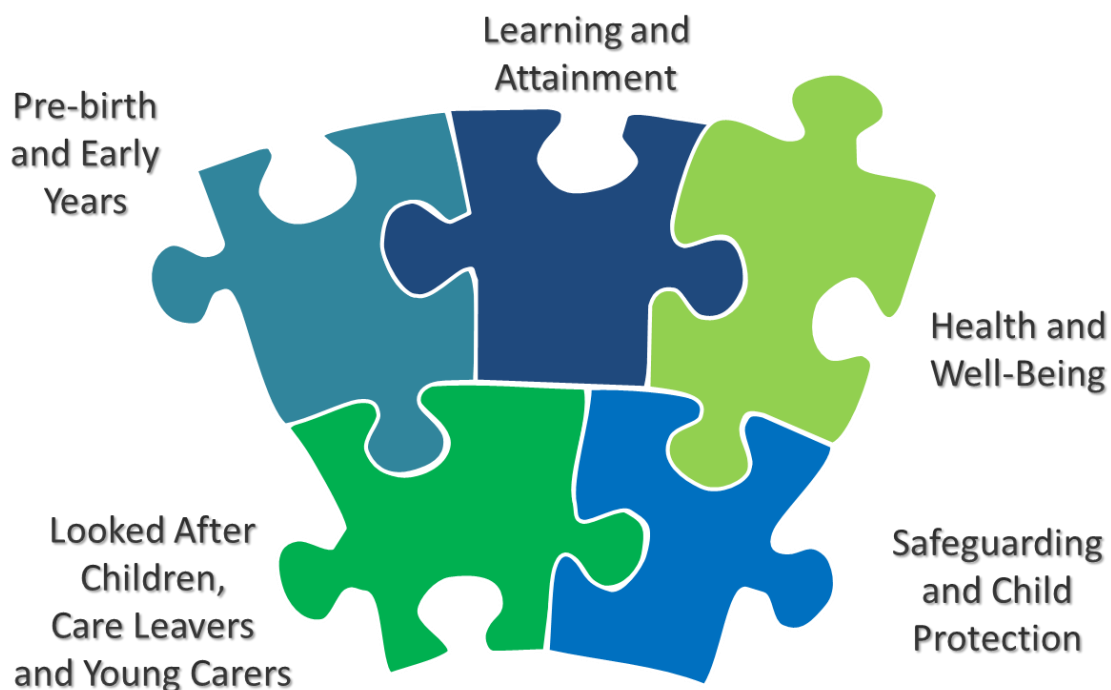

By considering all of the evidence available to us about the various matters affecting our children, young people and families, each of which can have a marked impact on their lives and their longer-term life chances, we agreed five priorities.

These priorities are underpinned by key policies, such as Getting It Right For Every Child and the consistent implementation of the Named Person and providing the right help at the right time; Curriculum for Excellence and Developing the Young Workforce.

We believe that addressing these priorities will help realise our shared vision for children, young people and families and make Tayside the best place in Scotland to grow up.

Our five priorities have informed a range of actions, some of which involve a continued focus on using existing services to achieve better outcomes in the short to medium term.

Other actions are more long-term, in that they initially involve the development of clear and consistent multi-agency strategies within which better decisions about the type and range of services to be delivered can be made.

All the work of the Collaborative is driven by achieving improvement on these five broad priorities of the ICSP and the success of the Collaborative will be evaluated against the impact on those priority outcomes. The challenge will therefore be to ensure that all initiatives within the Collaborative directly deliver for or influence those priorities leading to improved outcomes.

Key Enablers

In terms of taking the work on these priorities forward, there are a number of 'key enablers' that support teams to make progress. For example:

Political leadership

Collaborative leadership & organisational challenge

Cross-authority working:

- Strategic/ Joint Commissioning
- Shared Service Standards
- Capital Investment (including estate and asset review eg in the context of ELCC initially)
- Evaluation & Continuous Improvement
- Learning & Workforce Development (e.g. shared recruitment and virtual training hub, shared performance standards)
- Shared Engagement & Participation
- Data Analysis, Shared Systems and Common Approaches (e.g. assessment processes)
- IT/ Digital Development
- Shared position/ voice on national issues and a 'test bed' for ideas

Political leadership for this type of work is essential. Having considered practice, many involved in developing collaboration have cited an inability to secure and maintain support of leaders as being a significant factor in the demise of some collaborative working between authorities. Tayside has seen strong support from its political Leaders and Children Services' Convenors.

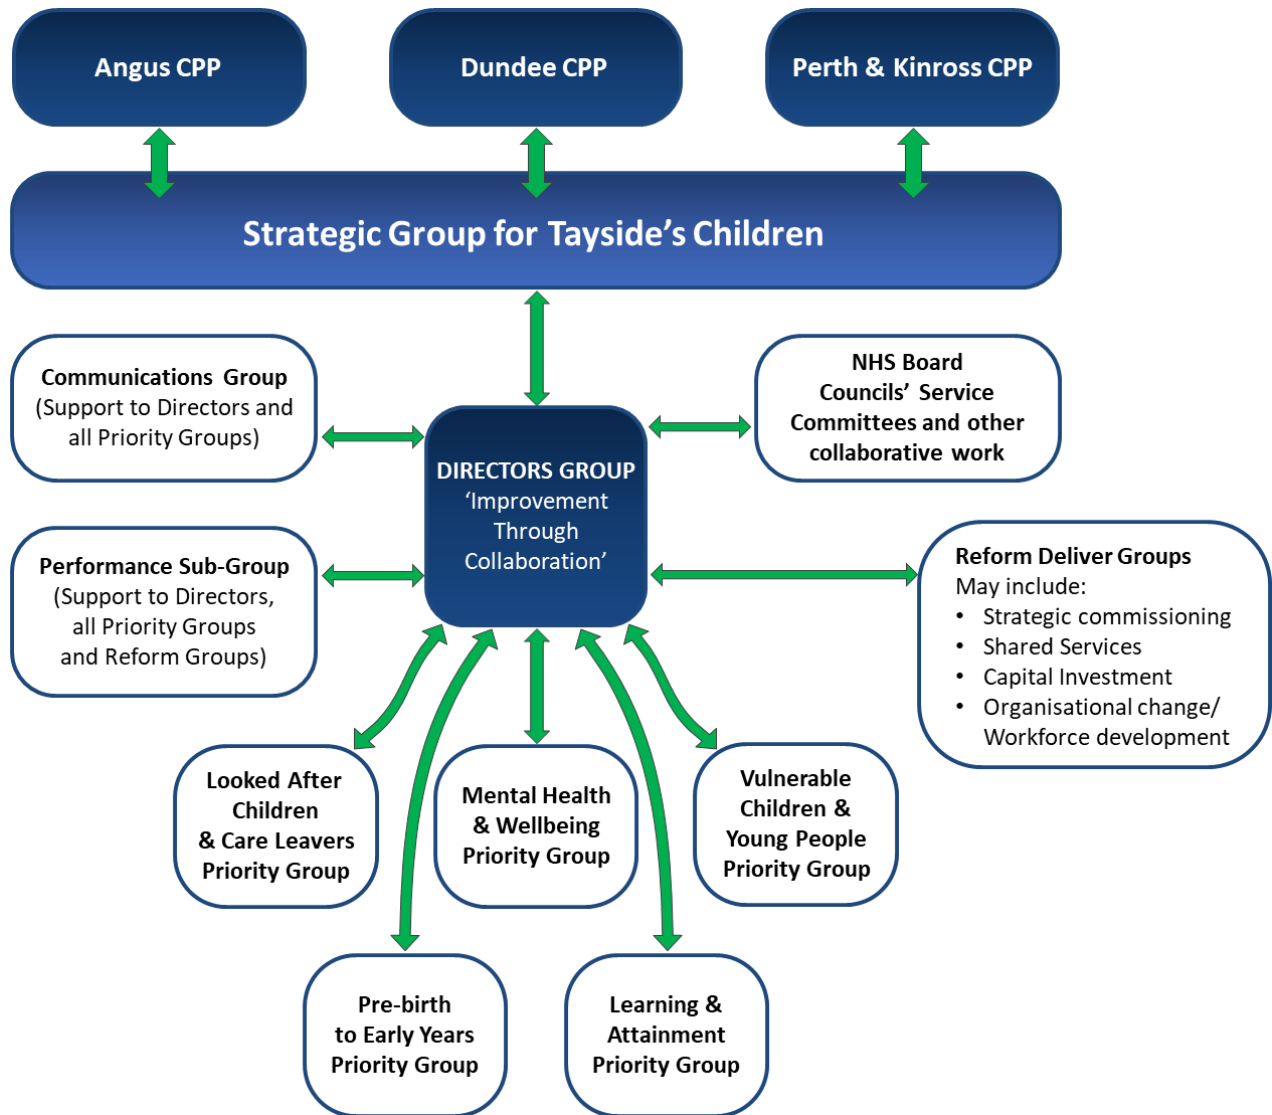

Collaborative leadership and organisational change have also been highlighted as a priority by Tayside. This was clearly set out in our 'Starter Paper' where it referred to a commitment to a 'collaborative culture and behaviour', based on trust, fairness, openness, no-blame, honesty and transparency. It also stressed the need to be willing to change and adapt to new ways of working in order to achieve the collective position. Work is underway to consider how to support teams to create a 'culture of collaboration' and ensuring that this permeates through all levels within each organisation.

Cross-authority working will provide a strong platform for the transformational programmes that need to operate at service level. This work will remove any barriers and agree approaches and criteria so that the teams working on the ICSP priorities are able to make good progress.

Further detail on the actual delivery mechanisms for both the ICSP priorities and the 'Key Enablers' is given in the following chapter.

CHAPTER THREE – Governance Arrangements & Delivery Mechanisms

This chapter sets out those mechanisms within the context of our Collaborative governance arrangements, as shown in the following diagram:

Further detail on the purpose and role of each group within those new governance arrangements follows.

Strategic Group

Purpose

- To hold the vision of the Collaborative.
- To lead the ambition to succeed at scale.
- To facilitate the context for committed collaborative operations.
- To ensure the success of the priorities in the Tayside Integrated Children's Service Plan (ICSP).

Reporting

The Strategic Group will receive reports on the Collaborative from the Directors' Group. This will cover progress across the five ICSP Priority Groups and the Reform Delivery Groups, (supported by the Performance Sub-Group).

All the Community Planning Partnerships will continue to be accountable for the delivery of the ICSP at a local level and so each authority will need to continue to ensure effective dialogue with that wider network at a local level.

Membership

Core Members: Chief Executives of Angus, Dundee, Perth & Kinross, NHS Tayside, Police Scotland, the Scottish Fire & Rescue Service and the Third Sector. The Integrated Joint Boards and the Chief Social Work Officers are also represented in this group.

Directors' Group

Purpose

- To provide clarity and direction to the teams delivering on the Collaborative, ensuring a shared focus on improved outcomes for Tayside's children; this group will work both as a collective leadership team, as well as assigned individual 'Senior Sponsor' roles for each ICSP priority.
- To review and agree proposals from the ICSP Priority Groups and the Reform Delivery Groups regarding prioritisation and delivery, ensuring that the agreement of all partners has been secured.
- To share key developments in their own areas of responsibility and consider opportunities for collaborative working where this will drive improvement on outcomes.
- To support and challenge each other on all key decisions that impact on delivery and outcomes for children in Tayside.
- To ensure effective engagement with wider collaborative work within and across the Councils, the NHS and other key partners.
- To evaluate the overall performance and effectiveness of the Collaborative in driving improvement.

Reporting

This group reports to the Strategic Group. It receives reports from the ICSP Priority Groups and from the Reform Delivery Groups, supported by the Performance Sub-Group. It is also supported by the Communications Groups (as required).

Membership

This group comprises the relevant Director with responsibility for Children's Services from each Local Authority and from NHS Tayside. The Regional ALO from Education Scotland and Regional link from the Care Inspectorate are members of this group. The group can also include a representative for the Chief Social Work Officers if required.

Communications Group

This group has been established (with a representative from each Council and from NHS Tayside), and an initial plan has been developed. Its remit includes both internal and external communications including the development of a shared website and it makes the link to wider 'change programmes' and organisational development work.

It works closely with the ICSP Priority Groups and is available to support the Directors' Group and the Strategic Group as required. Each representative is linked to the Senior Sponsor within their respective organisation.

Performance and Data Analysis Sub-Group

This group reports to the Directors' Group and provides co-ordination and programming support to the ICSP Priority Groups and the Delivery Reform Groups. Membership includes representatives from each organisation and work is driven by the specific needs of the groups, in addition to national developments relevant to the regional level.

ICSP Priority Groups

ICSP Priority Groups: (to operate for the 'life' of Plan)

- Group 1: Pre-Birth and Early Years
- Group 2: Learning and Attainment
- Group 3: Health and Well-Being
- Group 4: Looked After Children, Care Leavers and Young Carers
- Group 5: Safeguarding and Child Protection

Purpose

- To identify and develop priorities for collaboration.
- To be driven by the strategic vision, ICSP priorities and required outcomes.
- To do so in a way that enables progress to be collectively tracked.

Reporting

- Each group has an assigned a 'Senior Sponsor' to confirm the vision and provide ongoing challenge and support to the group.
- Each group will have an identified 'lead official' who is responsible for the work of that group, on behalf of all four organisations of the Collaborative. Lead officials meet regularly to ensure that plans are coherent.
- The work of each group is reported to the Directors' Group via the Senior Sponsor and the lead official. They will also be supported by the Performance Sub-Group who will take on a co-ordination support role.
- Each group will draw on the work of the Delivery Reform Groups as required (see later section).

Reform Delivery Groups

Purpose

These groups will be time-limited as they are focused on developing the mechanisms which will support collaboration, rather than directly delivering collaboration.

Reporting

As with the ICSP Priority Groups, they will report directly to the Directors' Group, with support by the Performance Sub-Group who will take on a monitoring and co-ordination support role.

Key Activities

The nature of each group will vary considerably in the nature of the task and their timing. One early priority was identified:

- Strategic/ Joint Commissioning Group (building on existing group activity).

CHAPTER FOUR – Progress Report & Next Steps for Priorities 1, 3, 4 and 5

Priority 1 – Our children will have the best start in life, they will be cared for and supported to learn in nurturing environments

What we will do to ensure children get the best start in life in Tayside:

- Provide targeted multi agency support to families to ensure children aged 0-5 years reach their developmental milestones
- Deliver a new Health Visiting Pathway and expand the Family Nurse Partnership Programme
- Deliver on the 5 ambitions of Ready to Act, the National Allied Health Professional (AHP) transformational plan
- Develop and implement an evidence-based Tayside parenting strategy in partnership with Health and Social Care and other appropriate partnerships
- Develop and deliver high quality, flexible early learning and childcare provision

What we have achieved:

The Pre-Birth and Early Years group has met every six weeks, and has worked with a number of sub groups to develop detailed action plans to take forward the following strategic priorities:

- Implement Best Start – Maternity and Neonatal Care
- Implement the Universal Pathway for Health Visiting across Tayside
- Expand the Family Nurse Partnership Programme to mothers who meet an extended eligibility criteria
- Implement Joint work with CELCIS, PKC and NHS in Addressing neglect and enhancing wellbeing, - pre-birth and into the first year of life
- Implement “Ready to Act”
- Develop and Tayside Parenting Strategy (overseen by Priority Group 3)
- Develop and deliver high quality, flexible early learning and childcare provision.

It is recognised that within the pre-birth and early years group there are four national transformation programmes:

- Best Start - Maternity and Neonatal Care
- Universal Pathway for Health Visiting
- Ready to Act – Allied health Professionals
- Expansion of 1140 hours of Early Learning and Childcare

All of these programmes are nationally driven, and have targets to meet over the next 3 to 5 years before they will be fully implemented. The focus for our first year has been to work towards implementation, and look for areas which support collaborative working practice. It is recognised that there is significant changes for the workforce and for communities in terms of culture, systems and practice, and the requirement to grow the workforce to meet the demand.

There are also two locally driven transformation projects:

- Extension of the Family Nurse Partnership to first time mothers aged 20-24 who meet the eligibility criteria
- CELCIS, PKC and NHS joint working on addressing neglect and enhancing wellbeing pre-birth and in the first year of life.

Over the past year, the group have refined and focussed on the key areas for development within large scale transformation projects, and there is now a clearer, shared focus on what actions need to be taken to improve outcomes across Tayside. With each of the main action areas, the following key achievements have been noted:

- Collaboration between maternal and infant nutrition team, family nurses and health visitors on increasing both initiation and continuation of breastfeeding has been assessed and awarded the UNICEF Baby Friendly Gold Community Award.
- Four workstreams have been developed to take forward implementation of the Best Start Programme.
- Collaboration with University of Dundee Angus RCM Award – women's feedback in relationship care.
- Infant feeding assistant has been agreed to support women in hospital.
- Perinatal Mental Health Midwife has been recruited to support this area of need.
- The universal health visiting pathway was implemented in May 2017, and the milestones to increase and sustain the workforce has been achieved
- The CELCIS project has completed the scoping phase and has identified a transformation zone in South/West Perth and Kinross
- Family Nurse Partnership has been extended to almost 100 women who met the criteria
- A comprehensive range of training and improvement programmes have been undertaken by AHP staff, to build capacity, change thinking and practice and support the use of improvement methodology. A package of training and support for early years practitioners across all agencies has also been developed to support evidence based key messages on early language development with parents and carers.
- A number of specific projects to support early literacy is being undertaken in all three local authority areas in collaboration with nurseries.
- Comprehensive consultation has taken place to support the development of a Tayside Parenting Strategy.
- The Tayside group of Early Years teams successfully delivered their expansion plan for the delivery of 1140 hours of Early Learning and Childcare to the Scottish Government and received confirmation of funding for implementation of the programme by 2020.

Whilst there are different models of delivery suited to the demographic and geographical needs of each area, the ELCC workstream is focussed on providing a consistent approach across Tayside, and are collaborating on four key areas:

- Quality Assurance
- Workforce expansion and development
- Partnerships including childminders
- Policy Development

In summary, greater collaboration and consistent approaches of service delivery and practice has been achieved in year one, and this will continue to be a focus of next year.

Our performance data is illustrated below:

Note that whilst the previous year's figures are generally shown for comparison, a longer time series of information is required to establish any trends in performance/ outcomes.

Indicator Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross	Improvement direction ¹
Children reaching all of their developmental milestones at the time of their 27-30 months Child Health Review to at least 85%	Not reported as this year as seen a change in a recording a new domain – figures are not comparable. Alternative indicator used below			↑
% of children with at least one developmental concern recorded at 27-30 months Child Health Review	21% (21%)	22% (21%)	19% (19%)	↓
Speech, language and communication – % of children with no concerns identified at 27-30 months Child Health Review	80% (82%)	81% (82%)	82% (83%)	↑
% of 2 year olds children who have accessed early learning and childcare provision		22%	10%	↑
% of 3 and 4 year old children who have accessed early learning and childcare provision		93%	97%	↑

Next Steps:

- Build relationship based practice across the early years workforce by embedding the Solihull approach in NHS, education, children and families and third sector partners.
- Focus on a greater level of support for maternal health within maternity services
- Develop a Test of Change in the impact of a Welfare worker on the outcomes for women within the FNP programme in Perth and Kinross
- Reduce the number of women requiring to be engaged in the Unborn baby protocol
- Implement the plan for the CELCIS project to build relationship based practice and community resilience to better support pregnant women and their families
- Test model of maternity Hub in Lochee
- Collate data on the impact of the implementation of the Universal pathway for Health Visiting on children and families to support improved outcomes
- Continue to deliver “ Ready to Act “ transformation programme
- Consider how to collaborate on improving early language skills in children aged 0-3, particularly those at risk of not meeting their developmental milestones
- Implement the expansion plans for the delivery of 1140 hours of ELCC across Tayside, and deepen collaboration on high quality service delivery
- Work with Education Scotland and Care Inspectorate to further develop leadership skills and capacity in self -evaluation as it relates to the ELC National Standard and Care Standards
- Assess the extent to which the expansion from 600 hours to 1140 hours has improved outcomes for children particularly those at risk of disadvantage between 2 and 5, and their parents’ ability to work, train or study.

- Further develop performance measures and data across all areas of activity to support evidence based practice, and to support improvement activity.

Barriers to Progress:

A consistent barrier across all agencies has been the collation of data to support improvement, and the capacity of agencies and practitioners to use improvement methodology to demonstrate the effectiveness of interventions. This is being addressed through joint working with the data team, and with the CYPIC advisor.

Recruitment of trained staff is a challenge for maternity services, health visiting and early years education services due to the expansion of national programmes. Workforce expansion and development programmes are in place across all areas, including Allied health Professionals who are developing new and better ways of working to ensure that they can meet the demands of an increasing need for their services.

Priority 3 - Our children and young people will be physically, mentally and emotionally healthy

What we will do to promote good physical, mental and emotional health for children:

- Develop and implement a Tayside multi-agency framework to prevent and address early initiation into substance misuse
- Develop and implement a Tayside Mental Health Strategy for children and young people to ensure a focus on prevention, early identification and support
- Implement the Pregnancy and Parenthood in Young People Strategy (PPYP) alongside work to reduce teenage pregnancy and support to young parents
- Develop a Tayside strategy to improve Child Healthy Weight
- Develop and implement, in partnership, an evidence based Tayside parenting strategy

What we have achieved:

In the past 12 months, a well-functioning Tayside Health & Wellbeing Priority Group (HWPG) has been established, which meets on a bi-monthly basis to drive forward, support and monitor progress towards achieving the above 5 actions and which has an engaged and committed membership from across the 3 Local Authorities, the Third Sector and NHS Tayside.

The Tayside HWPG has initiated and supported the establishment of multi-agency Task & Finish Groups, each led by a HWPG member, for 3 of the above 5 actions. A further action is being progressed by a recently established multi-agency Short Life Working Group and the remaining area for action, in its exploration phase, is currently being led by an NHS Tayside consultant.

Achievements towards delivering on the HWPG actions include:

- Production of a draft Tayside Parenting strategy which has recently completed consultation processes with practitioners and families
- An agreed Tayside partnership approach to implementing the national PPYP strategy, with a clear lead for this work and key agency/service reps accountable for the necessary actions; to build on the progress already commenced in this area in Tayside
- Securing joint leads, from NHS Tayside and a Local Authority to drive the work required to progress a Tayside mental health strategy, and the successful delivery of a planning workshop with a wide range of key stakeholders to produce a driver diagram for the progress of this work
- Planning of a pan-Tayside child healthy weight event for practitioners, leaders and community members; to inform, shape and lead to the co-production of a Tayside child healthy weight strategy
- Successfully securing Tayside's joint Alcohol & Drug Partnership (ADP) Lead Officer as lead for the Substance Use Prevention framework Task & Finish group

Additional achievements worth noting include:

- The direct involvement and support from the Scottish Government (CYPIC) national improvement adviser to all 5 areas for action for the Tayside HWPG
- Early connections made and relationships developed with the three Tayside Health & Social Care Partnerships (HSCP) to ensure policy developments are aligned and to enable improve transitions for children, young people and families
- Effective support and open communication with the identified 'Senior Sponsor' for the Tayside HWPG; the Director of Operations, NHS Tayside

Our performance data is illustrated below:

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross	Improvement direction
% of children with a BMI in a healthy weight (clinical) category at P1 review	84% (86%)	85% (83%)	79% (84%)	↑
rate per 1,000 of teenagers conceiving (under 20 years)	31 (29)	52 (51)	24 (30)	↓
% of P7 pupils with no obvious dental disease	81% (67%)	74% (65%)	83% (74%)	↑
Households with children or pregnant women in temporary accommodation, per 10,000 households	0.9 (1.9)	9.1 (8.5)	3.1 (6.7)	↓
Number of children in temporary accommodation per 10,000	7 (14)	67 (53)	18 (34)	↓

Early barriers in the Tayside HWPG's formation and activity, related to mental health strategy leads and identification and involvement of key partners have been overcome. The challenges faced by HWPG and Task & Finish Group members in relation to capacity and time are acknowledged, however, a focus on both investing now for greater future gain and on the opportunity to align mutually reinforcing new strategies to improve health and wellbeing outcomes for children is evidently helping to balance the challenge.

Next Steps:

Moving forward, the Tayside HWPG will continue to lead and support the work of the, multi-agency Task and Finish Groups and key individual leads, in order to achieve strategy development and implementation within the identified timescales.

In addition, HWPG members will be reviewing existing outcomes measures within the Tayside Plan for Children, Young People & Families 2017-2020, commencing with dental health measure in August 2018, and identifying relevant refined and/or additional measures. This work will be undertaken in conjunction with Tayside Plan Data Group members.

The HWPG will also be developing links and working with the Tayside Plan Commissioning Group members to inform, and be informed on, future commissioning activity related to the new health & wellbeing strategies being developed and, in time, implemented.

Priority 4 - Our children and young people who experience particular inequalities and disadvantage will achieve health, wellbeing and educational outcomes comparable with all other children and young people

What we will do to support children and young people experiencing disadvantage:

- Informed by the work of Fairness Commissions, work together to reduce the impact of poverty on our children, young people and families.
- Develop and implement a Corporate Parenting Strategy which pro-actively and systematically addresses the needs of Looked After Children and Care Leavers
- Ensure Looked After Children and Care Leavers are fully involved in decisions about their care and influence service delivery
- Ensure Young Carers are identified, provided with support, and assisted to manage appropriate caring responsibilities
- Ensure children and young people with complex and enduring needs experience high quality care and support and are included within their local communities
- Ensure children and young people with complex and enduring needs receive timely, effective support in their transition into adulthood
- Ensure that children and young people who have offended receive appropriate child-centred support which reduces the risk of re-offending

Our performance data is illustrated below:

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross	Improvement direction
% of children and young people placed in family based placements	92% (91%)	89% (90%)	92% (94%)	↑
% of openings lost to exclusions during academic year for looked after children		0.23% (0.39%)	0.21% (0.34%)	↓
% of looked after children in positive destinations post school	79% (70%)	84% (85%)	82% (83%)	↑
% of looked after school leavers gaining Literacy & numeracy at SCQF level 4 or better	46% (44%)	40% (58%)	71% (48%)	↑

Corporate Parenting- In the last 12 months, partners in the 3 Local Authority areas have developed Corporate Parenting Plans designed to promote the 8 outcomes for Looked After Children and Care Leavers outlined in the Children and Young People (Scotland) Act 2014. In addition to general health and wellbeing, this includes a focus on required improvements

in school attendance, exclusions, attainment and positive destinations. Building on this, partners have also informed the provision of additional Scottish Government funding to build capacity for care experienced children and are presently collaborating to target this at areas of greatest need.

In order to improve permanence planning processes, a joint family placement quality assurance post was established between Angus and Dundee. Building on this, all 3 local authority areas jointly carried out an options appraisal on approaches towards developing and reviewing effective Child's Plan's for all Looked After Children. Options being considered include the development of a single regional service or the development of a consistent approach across the area, the outcome of which will progressed over the next 12 months.

Partners are also developing a single strategy for engagement and participation with Looked After Children and Care Leavers. The parameters of the strategy have been agreed and will include the shared development of approaches which reflect the age, stage of development and interests of individual and/or groups of children and young people. Crucially, the strategy will involve mechanisms to ensure that their views are systematically obtained and routinely inform both day-to-day practice and the longer-term design, delivery and development of services.

Young Carers - Each Local Authority area has now developed a Carers Strategy which outline processes to improve the identification, assessment and support of Young Carers. This is already starting to lead to increases in the numbers of known Young Carers and the provision of support which ranges from advice and guidance to more intensive packages where this is required. Going forwards, partners have committed to the development of a shared performance framework and a shared approach towards short-breaks.

Complex and Enduring Needs - In the last 12 months, partners have coordinated the development of a number of shared strategies relating to accessibility, speech and language therapy and mediation. This work has had a particular focus on improving the inclusion of children and young people and over the next 12 months will be supported by associated training and workforce development. Going forwards, partners have also committed to the development of a single autism strategy.

Young People Who Have Offended - Partners work in this area has initially focused on the development of shared approaches towards risk assessment through the regional use of the same tool and joint workforce development. This includes both generic risk assessments and assessments of those young people who have been identified as being at risk of causing significant harm. Going forwards, partners have committed to a consistent approach towards Early and Effective Identification and Diversion from Prosecution processes and responding to specific crime trends or associated issues, such as internet crime and substance misuse.

Next Steps:

Collectively, these actions appear to be contributing towards some reductions in inequalities in these priority groups. There have been marked improvements in the number of school exclusions across all three Local Authority areas. However, as our performance framework illustrates, partners still need to consistently focus on improving attainment levels and positive destinations of care experienced children and young people in particular. Over the next 12 months, our priorities will therefore involve:

- Targeted use of additional funding for Looked After Children and Care Leavers
- Implementation, monitoring and review of an agreed approach towards the quality assurance of care experienced children and young people's plans
- The development and implementation of a shared engagement and participation strategy
- The development of a shared approach towards short-breaks and a performance framework relating to Young Carers
- A shared focus on the inclusion of children and young people with complex and enduring needs and an autism strategy
- Consistent approaches towards risk assessments, prevention/early intervention and priority crimes for young people who have offended

Priority 5 - Our children and young people will be safe and protected from abuse at home, school and in the community

What we will do to keep children safe:

- Our approach to protecting children and young people will be integrated and focused on early intervention, immediate action and effective intervention to remove and reduce the risk of significant harm

Multi-agency partnership-working to protect children and young people predates the creation of the Tayside Plan for Children, Young People and Families 2017-2020. This can be demonstrated by longstanding commitment by the three Child Protection Committees (CPCs) to sharing practice and to pooling resources e.g. for workforce development. Network meetings including Tayside CPC Lead Officers; Learning and Development Officers; and the Central and North East Child Protection Committees Consortium had already provided opportunities for joint working.

Priority group 5 was established in September 2017 and quickly identified opportunities to add further value by prioritising a collaborative approach to a number of common key areas which already featured within CPC improvement plans. The initial focus of priority group 5 is to ensure incremental improvements to result in consistent high quality child protection practices across the collaborative. It is envisaged that this will provide a more solid foundation for larger scale change and moving towards greater sharing of resources and integrated models of delivery over the life time of the plan. A delivery plan is supported by Action Groups with representation sufficient to implement improvement across agencies forming the collaborative and a clear remit to achieve step change in key areas which are notoriously complex and problematic both locally and nationally. Taking time to connect through regular meetings and developing shared understandings of similarities or variations is building stronger partnership working. Monitoring progress systematically is identifying barriers and inhibitors to achieving best practice and stimulating collaborative solutions.

What we have achieved:

- The group has an assigned Senior Sponsor to confirm the vision and provide ongoing challenge and support to the group. (DCI Graham Binnie)
- The group has an identified Lead Officer who is responsible for the work of that group, on behalf of all four organisations of the Collaborative. (Jacquie Pepper)
- The work of each group is reported to the Directors' Group via the Senior Sponsor and the Lead Officer.
- The Chairs of the Child Protection Committees are responsible for ensuring that the work of the group is reported to each of the three Child Protection Committees and Chief Officers Groups in order that they are informed and able to comment, inform and influence.
- Good progress is being made and we are on target for new suite of guidance by end of December 2018. The group has recognised that this is more than the production of written guidance and that there needs to be culture and practice change. Multi-agency staff groups across Tayside are informing the new guidance, practice direction and associated workforce development.
- A Consultant Paediatrician from NHS Tayside has joined the group and will also contribute to the IRD Action Group. They will lead on the revision of the Tayside Protocol for conducting Joint Paediatric Forensic Medical Examinations ensuring that the planned improvements for IRDs and all new guidance will dovetail and ensure robust decision-making for medical assessment/examination.
- Recognition that Dundee and Perth and Kinross are taking forward improvements aimed at meeting unmet need; addressing neglect and enhancing wellbeing in partnership with CELCIS. Recognition that Angus is taking forward work on tackling Neglect and the Graded Care Profile. There is a desire to share learning from each across the Tayside.
- The Tayside Child Protection Learning and Development Group is arranging a Tayside-wide Shared Learning Event aimed at 200 Operational Managers and Practitioners on 16 November 2018. Event will be funded from the Tayside Joint Child Protection Learning & Development Budget and planned in partnership with CELCIS and the Improvement Leads in Dundee and Perth and Kinross. Entitled "Connect with Neglect" the event will make connections between research and practice.
- Exploring opportunities to involve local children and young people in developing cyber security; personal safety; CSE awareness and explore the potential to work with experts at Abertay University. Initial mapping and scoping exercise about current programmes aimed at keeping children safe online carried out by 3rd sector reps across all three local authority areas and being extended to FE colleges.
- Considering a target vulnerable group – (Children a learning disability; children not in school; or younger children. Making links with CPC Child Sexual Exploitation Work Plans. Exploring research and development opportunities with Abertay and potential for shared funding of a Graduate / Post Graduate Student being explored. Action Group membership to be revised to reflect the expertise required.
- Mapping of existing processes across the three CPC areas underway to be followed by researching practice by Chairs of Child Protection Case Conferences. Once Complete group will identify a few key areas for implementation across Tayside. Potential for joint commissioning of advocacy services will now be explored.
- Scottish Government/CELCIS/Care Inspectorate consulted with CPCs on a Shared Dataset nationally. The three Tayside CPCs have contributed to the development of a North and Central CPC Consortium to produce a shared dataset. Tayside CPCs have pre-existing CPC Datasets which have been collated and will use this along with new Care Inspectorate Inspection Model for CP and LAAC. Meaningful qualitative key performance measures in keeping with the Tayside Plan will be agreed September 2018.
- Tayside Chronology Action Group established with a remit to review the existing Tayside Chronology Guidance and Template and to make the necessary changes to ensure

consistency and promote quality assurance. Membership includes education and social work representatives across all three local authorities. On target to produce revised guidance by October 2018 and implemented thereafter via a Tayside-wide multi-agency workforce learning development plan.

- Updating guidance for Chief Officers Groups
- Draft updated national guidance shared and considered at the Child Protection Leadership Event in April 2018 – Angus, Dundee and P & K Chief Officers, CPC Chairs and CSWOs took part in workshop and explored implications. PG5 Lead Officer and CPC Chairs will plan an event involving all Chief Officers and CPC members across Tayside to take forward joint agreement about guidance for COGs and CPCs.
- ICRs and SCRs – Sharing learning across Tayside
- PG5 has agreed a First Paper – Analysis of Child Protection Initial and Significant Case Reviews undertaken across Tayside from January 2016 and comparison to national trends. Proposal to share at a Tayside Child/Public Protection event involving Chief Officers Groups and CPCs.
- Tayside Workforce Development Plan for child protection across Tayside
- Tayside Child Protection Learning and Development Group Work Plan 2018 – 2020 published June 2018 and includes Tayside Inter-Agency Learning and Development for IRDs, Chronologies and the Shared Learning Event: Connect with Neglect. Regular Joint Meetings planned for Tayside Child Protection Lead Officers and Learning and Development Officer to ensure plan is resourced and implemented.

Our performance data is illustrated below:

Indicator: Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross	Improvement direction
Emergency admissions from Unintentional Injuries for children aged 0-15	145 (154)	213 (229)	140 (202)	↓

Next Steps:

There will be a review of the priority group 5 delivery plan before the end of 2018 and a focus on ensuring that the work is moving towards greater sharing of resources and integrated models of delivery.

CHAPTER FIVE – Evaluation of Phase One Plan

The following table summarises the feedback provided on phase one of the TRIC plan and the action taken by the Collaborative to inform the development of phase two.

Recommendations and areas for consideration	Actions
<p>More detail required on planned delivery</p>	<p>The original four workstreams agreed by the TLAG have individual action plans:</p> <ul style="list-style-type: none"> ✓ Learning and teaching (feedback) ✓ Numeracy ✓ School Improvement ✓ School Leadership <p>These have been developed by a cross section of practitioners from across the region with the facilitation of a lead officer. Schools have been identified and/or volunteered to participate. Staff from these schools have the shaped the associated intervention within each workstream plan. These plans are set out in chapter seven of this report along with plans for an additional two workstreams developed in response to collective self-evaluation leading to the creation of the phase two plan:</p> <ul style="list-style-type: none"> ✓ Curriculum leadership ✓ Building capacity in the effective use of research & evidence
<p>Detail how evidence-base informed planning and how this is linked to school and authority improvement planning</p>	<p>The original themes set out above were drawn from each authority's self-evaluation which is built upon the needs analysis of individual schools. Collaborative work on the topic of school improvement had already taken place before the inception of the TRIC which formed a good foundation for informing future direction. Consultation them took place with the TRIC wider leadership forum to help shape the then emerging themes. Phase 2 of the plan has been informed by this evaluation for session 2018/19 and two additional workstreams have been developed. A review of common school improvement themes from across Tayside schools has taken place. Sophistication around analysis of shared data is developing and being refined.</p>

<p>Consider broadening range and reach of priorities</p>	<p>As each workstream has developed a detailed action plan, the scope and extent of project reach has been assessed. The school improvement theme for example includes both a universal school offer as well as targeted support for identified schools as does the numeracy sub-theme. The feedback project is a deeper piece of work focussed initially with six schools from across the region and developed in partnership with an external provider and GTCS. The leadership theme will impact on middle leaders and new Head Teachers from August 2018. In short, the scope of each workstream is tailored to the planned impact of the work. Existing collaboration (before the inception of the TRIC) is already very successful in the area of modern languages 1 & 2.</p>
<p>Specify educational strategies, performance measures and interventions.</p>	<p>Each workstream has specified their interventions and associated performance measures. This will have a continued focus in phase two of the plan and support has been accessed from Education Scotland and the Scottish Government's Improvement Advisor. Performance leads from each local authority and the NHS are working in partnership to develop a collaborative baseline of data that can be used year on year to assess progress.</p> <p>A day event for school leaders with the Education Endowment Foundation has further supported the effective identification of interventions at school level.</p>
<p>Consider involvement of stakeholders</p>	<p>A wider leadership forum has helped inform developing plans. Staff groups in individual schools are engaged in individual project themes. The Regional Lead has provided updates to school leaders and we have developed a newsletter to share updates. A shared website resource is under development.</p>
<p>Consider stronger focus on specific groups of children e.g. looked after children</p>	<p>Priority group four of the ICSP has the lead focus for developing collaborative interventions to support vulnerable groups, highlighted in chapter four. Priority group leads meet regularly to ensure cohesion between the work of all five priority areas. The TRIC put together a specific proposal to support the achievement of LAC which was presented to the SG. Unfortunately this was not successful for being assigned resource.</p>

Increase pace of work	Progress since January has been significant. All four TRIC workstreams are established, planned and making progress. This was commented on positively by our Education Scotland lead at our last meeting of session 2017/18. The commitment from staff, particularly workstream leads is commendable and they have risen to the challenge of leading this work in addition to their core duties.
Ensure TLAG group monitors workstream progress	The TLAG meets every 6 weeks. Monitoring the progress of the 4 workstreams is a standing item on the agenda. The TLAG offers support, challenge and advice. The group is working well and differences of opinion are expressed and used to develop our collaborative expertise. An action log of decisions is maintained and used as a reference point for the monitoring of progress. Workstream leads are enthusiastic and positive ambassadors for the further development of collaborative working in their lead area.
Ensure development of collaboration	All aspects of the work of the TLAG are built upon collaboration. The very good working practices that had been developed through shared work on school improvement has contributed to the fast progress of work between January and June 2018. The priority group leads have considered how to further develop effective collaboration and a session is in the process of being developed for all priority group members to consider how we can take our collaboration to the next level.
Consider resourcing requirements	A workforce plan has been developed and can be found in chapter eight of this report.

Development of Phase One Plans:

Key developments in moving from Phase one to Phase two, including taking account of national guidance

We have a detailed analysis of all available evidence on educational performance within our region and have increased confidence in selecting which aspects of performance relate specifically to our actual and proposed interventions. Our TRIC work sits under the umbrella of our ICSP and therefore draws on data and information from other key sources, particularly health. Schools are accessing support by being approached or volunteering. In time the development of universal offers of support will be highlighted to all schools. The Regional Lead has spoken to all school leaders across the region about our progress and plans. A group is being established under the leadership of our regional Education Scotland lead to support continuous improvement in curriculum development and our interventions are underpinned by a clearly understood approach to improvement supported by our Scottish Government Improvement Advisor.

Our collective work is shaped by the improvement planning of our schools and their well-established processes for self-evaluation which includes gathering other peoples' views has been drawn into phase 2 planning. Further work is required to outline clearly how key partners such as parents, communities, the third sector and young people have contributed to the development of the plan. A sixth priority two workstream focused on building expertise in research and evidence has been identified as essential to developing schools as learning organisations and enhancing collaborative professionalism throughout our system.

CHAPTER SIX – Analysis of Tayside School Improvement

Though effective self-evaluation for continuous improvement, schools across Tayside have identified the following most common improvement themes:

Angus:

- Evidence based approaches to improve learning and teaching
- Family engagement
- Improving attainment in writing

Dundee:

- Continue to raise attainment and close the poverty related gaps in literacy and numeracy
- Specific focus on developing numeracy with CLPL programmes focusing on conceptual understanding of number
- Improve outcomes for LAC - attainment, attendance, exclusions

Perth and Kinross:

- Literacy
- Numeracy
- Learning and Teaching

The majority of these improvement priorities will be supported through the implementation of existing ICSP and TRIC plans. Literacy leads from the region are currently collaborating to identify whether any regional activity in this area can enhance individual local authority working.

CHAPTER SEVEN – Priority 2: Learning and Attainment, Progress and Next Steps

Over the first year of the ICSP plan, priority group 2 has focused on building the foundations for effective collaboration across Tayside to improve learning experiences and educational outcomes. An opportunity for refining these approaches came in January 2018 with the requirement to develop a Tayside regional improvement collaborative (TRIC) plan focused on closing the attainment gap and raising achievement for all. The group responded to this challenge by identifying four workstreams that would benefit from collaboration. These workstreams were drawn from an analysis of school improvement plans and agreed within a wider leadership forum of educational leaders. The four workstreams are:

1. Learning and teaching with an initial focus on feedback
2. Numeracy
3. Leadership
4. School improvement

Comprehensive planning has taken place, schools and colleagues to participate in each workstream have been established and collaborative work is proceeding at pace. On the basis of ongoing evaluation and an analysis of school improvement plans from across the region two further workstreams have been identified:

5. Curriculum Leadership
6. Building capacity for effective use of research and evidence

Actions plans for each of these workstreams can be found later in this chapter.

Through the school improvement theme and learning and teaching focus on feedback and numeracy work is underway to ensure children who are at risk of not achieving their potential are provided with the extra support they need. Sharing about the effective use of Pupil Equity Funding (PEF) has taken place in the context of extended input to school leaders about effective educational interventions, tailoring approaches to individual contexts and measuring impact. Each local authority has analysed and shared year one use of PEF.

Outcomes have been shared about interesting pieces of work in relation to engagement and participation which provide parents, carers and young people with opportunities to be active partners through supported learning and consultation on improvement plans.

Our performance data is illustrated below:

Indicator Latest year (previous year/ baseline)	Angus	Dundee	Perth & Kinross	Improvement direction
% of local residents satisfied with schools	76% (76%)	67% (65%)	83% (85%)	↑
% of secondary school pupils achieving 5 plus awards at SCQF level 5 or higher	60% (58%)	54% (52%)	63% (62%)	↑

% of pupils who stay on from S4 to S6	51% (52%)	59% (59%)	55% (60%)	↑

Further analysis of post-school data identified relative strengths across the Tay collaborative in the implementation of initiatives for post-school training, apprenticeships and further and higher education to improve pathways to employment. Sharing of practice has taken place and Angus and Dundee are working together to further implement an innovative approach to the senior phase called Future Skills College (FSC) along with Dundee and Angus College. The Future Skills College opened on 5 June 2017 with 28 students and is employment led, with students recruited exclusively on the basis of actual vacancies identified by local employers for apprenticeships or trainees. The initial offering is for places in plumbing, electrical and for early years education and childcare. Beyond securing sustained positive destinations in employment for young people FSC will raise the status of the apprenticeship pathway among young people, as well as their parents and teachers. Further analysis is planned in relation to participation measures to identify any necessity for further joint working in this area.

In order to promote collaborative working across schools and their communities to support robust self-evaluation, and improved quality of provision, a consistent approach to school leadership development is being rolled out. This includes an effective induction programme for new head teachers and comprehensive school leadership support within and across schools. It is anticipated that priority group 2 will consider increased multi-agency self-evaluation using new inspection information when that becomes available. The school improvement theme is building on the collaborative approaches to improvement already trialled across the collaborative. A small number of schools will receive intensive cross-authority support in order to support the leadership of improvement and a universal approach to improving school collaboration through the creation of a strengths directory is underway.

The focus on supporting young people to make informed choices and exercise greater control as they transition to adulthood is being directed by priority group 3 and the development of curriculum materials on the topic of substance misuse is in process. These will join our already successful collaborative resource on sexual health, relationships and parenthood.

An established network of professionals across Tayside review and plan multiagency supports for youngsters with complex needs ensuring a close partnership working is designed to close inequality gaps, address complex needs and share good practice that already exists.

Next Steps:

Individual workstream plans have been developed by a cross section of practitioners from across the region with the facilitation of a lead officer. As each workstream has developed a detailed action plan, the scope and extent of project reach has been assessed. The school improvement theme for example includes both a universal school offer as well as targeted support for identified schools as does the numeracy sub-theme. The feedback project is a deeper piece of work starting off with 6 schools from across the region and developed in partnership with an external provider and the GTCS. The leadership theme will impact on middle leaders and new Head Teachers from August 2018. In short, the scope of each workstream is tailored to the planned impact of the work. The focus is now on implementation and evaluation in order to assess whether the intervention should be rolled out.

Each workstream has specified their interventions and associated performance measures. This will have a continued focus in year two of the plan and support has been accessed from Education Scotland and the Scottish Government's Improvement Advisor. Performance leads from each local authority and the NHS are working in partnership to develop a collaborative baseline of data that can be used year on year to assess progress.

Continued focus on communicating the work of the collaborative will be supported by the establishment of a website to enhance the face to face and written updates as well as extend the reach of key messages. The priority group will also plan and assess focused interventions for looked after young people in response to the provision of national resource.

All aspects of the work of priority group two, the TLAG is built upon collaboration. The very good working practices that had been developed through shared work on school improvement has contributed to the fast progress of work between January and June 2018. It is anticipated that the pace of this work will increase as consideration is given to additional areas of collaboration and ensuring the impact of those already in train. Each workstream has developed an action plan as follows:

TLAG Learning and Teaching (Feedback) Group Plan

<p>Improvement Outcome: Developing effective Feedback to learners.</p> <p>Establish a culture of collaboration, innovation and exploration</p>		
<p>Workstream Lead: Michelle Lewis</p>		
<p>NIF Priority (highlight those that apply):</p> <p>Improvement in attainment, particularly in literacy and numeracy; Closing the attainment gap between the most and least disadvantaged children; Improvement in children and young people's health and wellbeing; and Improvement in employability skills and sustained positive school leaver destinations for all young people.</p>	<p>NIF Driver(s): (highlight those that apply)</p> <ul style="list-style-type: none"> • School leadership • Teacher professionalism • Parental engagement • Assessment of children's progress • School improvement • Performance information 	<p>HGIOS4 QI(s): (highlight those that apply)</p> <ul style="list-style-type: none"> • 1.1 Self Evaluation for self-improvement • 1.2 Leadership for learning • 1.3 Leadership of change • 1.4 Leadership and management of staff • 1.5 Management of resources to promote equity • 2.1 Safeguarding and child protection • 2.2 Curriculum • 2.3 Learning teaching and assessment • 2.4 Personalised support • 2.5 Family learning • 2.6 Transitions • 2.7 Partnership • 3.1 Ensuring wellbeing, equality and inclusion • 3.2 Raising attainment and achievement/Securing children's progress • 3.3 Increasing creativity and employability/ Developing creativity and skills for life and learning

Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale
Self-evaluations to establish baseline for improvement	Level of reflection and capacity for improvement	Collation and analysis of self-evaluations from leaders, teachers and learners	Self-evaluations disseminated, carried out and data collated.	Participants in programme ML LM GD	By end of Sept 2018
Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale
Agreed evidence-based project proposals	Appropriate identification, rationale and measurement tool to support proposal	Professional dialogue with schools, external experts.	Each participant after discussion with experts submit proposal for small test of change	SPhilp (Osiris) PWatson (ES)	End Sept 2018
Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale
Small tests of change in improving feedback with targeted group/cohort	Improvement in feedback to learners. Increased engagement in learning.	Improvement methodology (PDSA) Or Practitioner Enquiry group	Each participant will undertake small test of change on proposed area of improvement and feedback to sectoral discussion group (face-to-face and/or on the TRIC Microsoft Teams site).	CSimpson (GTCS) KMcQuaid (Scot Gov) JMcLean (ES)	End of Nov 2018
Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale
Sharing of learning across the TRIC to build capacity and to potentially upscale the project next session	Challenges/successes of each small test of change. Increase in professional collaboration and level of collective efficacy across each participating group and the TRIC.	Collective Teacher belief scale Evaluations from participants Revisiting initial self-evaluation proformas	A 'Market-place' event to provide all participants the opportunity to share their final project findings with colleagues.	ML LM GD SPhilp (Osiris) PWatson (ES) CSimpson (GTCS)	End of February 2019

TLAG Numeracy Group Plan

<p>Improvement Outcome:</p> <p>Develop a shared understanding of what constitutes “<i>effective learning and teaching approaches that promote positive attitudes and develop high expectations, confidence and resilience in maths</i>” (Making Maths Count: Recommendation 4, Scottish Government, 2016)</p> <p>Establish a culture of collaboration, innovation and exploration</p>		
<p>Workstream Lead: Carol Lyon</p>		
<p>NIF Priority (highlight those that apply):</p> <p>Improvement in attainment, particularly in literacy and numeracy; Closing the attainment gap between the most and least disadvantaged children; Improvement in children and young people’s health and wellbeing; and Improvement in employability skills and sustained positive school leaver destinations for all young people.</p>	<p>NIF Driver(s): (highlight those that apply)</p> <ul style="list-style-type: none"> • School leadership • Teacher professionalism • Parental engagement • Assessment of children’s progress • School improvement • Performance information 	<p>HGIOS4 QI(s): (highlight those that apply)</p> <ul style="list-style-type: none"> • 1.1 Self Evaluation for self-improvement • 1.2 Leadership for learning • 1.3 Leadership of change • 1.4 Leadership and management of staff • 1.5 Management of resources to promote equity • 2.1 Safeguarding and child protection • 2.2 Curriculum • 2.3 Learning teaching and assessment • 2.4 Personalised support • 2.5 Family learning • 2.6 Transitions • 2.7 Partnership • 3.1 Ensuring wellbeing, equality and inclusion • 3.2 Raising attainment and achievement/securing children’s progress • 3.3 Increasing creativity and employability/ Developing creativity and skills for life and learning

Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale

TLAG Building Capacity in the Effective use of Research and Evidence Group

Improvement Outcome: Develop the critical skills required by leaders and practitioners to support the establishment of a culture of collaboration, innovation and exploration by recognising that a self-improving system has learning at its heart with empowered children, staff and partners.

*This workstream action plan is currently under development

Workstream Lead: *TBC

NIF Priority (highlight those that apply):

Improvement in attainment, particularly in literacy and numeracy;
Closing the attainment gap between the most and least disadvantaged children;
Improvement in children and young people's health and wellbeing; and
Improvement in employability skills and sustained positive school leaver destinations for all young people.

**NIF Driver(s):
(highlight those that apply)**

- School leadership
- Teacher professionalism
- Parental engagement
- Assessment of children's progress
- School improvement
- Performance information

**HGIOS4 QI(s):
(highlight those that apply)**

- 1.1 Self Evaluation for self-improvement
- 1.2 Leadership for learning
- 1.3 Leadership of change
- 1.4 Leadership and management of staff
- 1.5 Management of resources to promote equity
- 2.1 Safeguarding and child protection
- 2.2 Curriculum
- 2.3 Learning teaching and assessment
- 2.4 Personalised support
- 2.5 Family learning
- 2.6 Transitions
- 2.7 Partnership
- 3.1 Ensuring wellbeing, equality and inclusion
- 3.2 Raising attainment and achievement/Securing children's progress
- 3.3 Increasing creativity and employability/ Developing creativity and skills for life and learning

Key Outcome	What impact will you measure?	How will you measure it?	Actions	Personnel	Timescale
To develop capacity within schools and clusters to improve learning by supporting the development of schools as learning organisations within the context of children's services.	*This workstream action plan is currently under development

To act as a catalyst to develop organisational practices and cultures within Tayside to help professionals collaborate for improvement.	*This workstream action plan is currently under development				

CHAPTER EIGHT – Workforce Plan to Support Delivery

The scale of the Tayside Regional Improvement Collaborative may be (relatively) small in geography but it is ambitious in respect of what it seeks to achieve. The TRIC is committed to working across organisational boundaries, in flexible ways, seeking always to bring about improvement in outcomes for children, young people and their families.

The table below summarises the core team who will help lead and support the ambition of the TRIC to become a reality. Additional resource is being sought from the Scottish Government to develop this team beyond its current composition of the RIC Lead and the Regional Advisor from Education Scotland.

Role	FTE
Regional Improvement Lead	PKC *
Regional Advisor (Education Scotland)	1.0 FTE (ES)
Project Officer	1.0 FTE (SG)
Admin Officer	1.0 FTE (SG)
Website & HUB development and Comms Strategy	1.0FTE MA (SG)
Resource to provide additional capacity for leadership of The Learning and Attainment Group's work streams.	Equivalent to £68K

*It is not possible to define an FTE allocation for the dual role Executive Director of Education and Children's Services and TRIC Lead.

These posts are essential given the scale of activity taking place across the TRIC and support planning, governance and leadership of all aspects of the work of our Regional Improvement Collaborative.

In addition to this small core team, there are a number of Priority Groups who are responsible for planning and implementing the agreed actions and tasks which were identified in the Tayside Plan for Children, Young People and their Families. These groups are lead and populated by colleagues who work in other substantive roles in a local authority, NHST, Police Scotland and various 3rd Sector Organisations. Their salaries are paid for by their employing organisation.

Each work stream has been developing the working arrangements as set out in our Phase 1 Plan. It is not possible to provide a clear demarcation in terms of FTE for each of these colleagues in relation to their TRIC specific activity. However, no resource is being asked to fund the group leads of their core membership.

We are however, seeking resources to support each Priority Group with operational costs and also administrative tasks. In addition to this, each Priority Group has been asked to identify what additional resource they would require to assist in achieving their stated outcomes. Information relating to these additional "asks" is outlined in the following sections. The operational budget is a small, nominal amount of money that will provide each of the Priority Groups with the resource required to fund a range of things such as:

- Covering the costs of any meetings or training sessions etc.
- Covering the costs of any stationery, printing, design etc.

Work stream Delivery

The tables below provide the following information;

- Work stream Sponsor (providing strategic oversight, support and challenge)
- Work stream Lead (leading the specific work stream across the TRIC)
- Work stream Participants (colleagues identified from constituent local authorities/partners)
- Additional Resources Required (additional resources required to support future delivery, including Education Scotland resources)

Pre-birth and Early Years

Work stream Sponsor	Work stream Lead	Work stream Participants
Paul Clancy	Sharon Johnston	<ul style="list-style-type: none"> • Head of Education: Early Years and Primary, PKC (Chair) • Chief Midwife (NHS Tayside) • Consultation Neonatologist (NHS Tayside) • Lead Nurse Early Years (NHS Tayside) • Lead Nurse/Service Manager Children and Young People (NHS Tayside) • Allied Health Professional Lead (NHS Tayside) • TSI representative (Dundee TSI) • Education Manager Early Years (Dundee) • Education Officer (Angus) • CELCIS project officers (Perth and Kinross Children and Families and NHS Tayside)
Additional Resources Required	<ul style="list-style-type: none"> • Welfare Rights Officer (see Appendix 1) • Operational budget • Care Inspectorate Support for expansion of ELC – TBC • Roll out of The Solihull Approach to 70 early years classes and centres over 2 years - and training of staff across NHS, education and children' services and 3rd sector (see Appendix 2) 	
<p>Anticipated Impact</p> <p>It is recognised that within the pre-birth and early years group, there are four national transformation programmes;</p> <ul style="list-style-type: none"> ▪ Implementation of Best Start – Maternity and Neonatal Care ▪ Implementation of the Universal Pathway for Health Visiting ▪ Implementation of Ready to Act – Allied health Professionals ▪ Expansion of Early Learning and Childcare <p>All of these programmes are nationally driven, and all have targets to meet over a number of years before they will be completed. The focus at this time is to implement the transformation, recognising that there is significant change in terms of culture, systems and practice and the requirement to grow the workforce to meet the demand.</p> <p>There are also two locally driven transformation projects:</p> <ul style="list-style-type: none"> ▪ Extension of the Family Nurse Partnership to first time mothers aged 20 -24 who meet the eligibility criteria ▪ CELCIS project on addressing neglect and enhancing wellbeing in Perth and Kinross ▪ The embedding of the Solihull approach to working with children and families across the multi-agency workforce in Tayside, including health professionals, education and children's services and third sector partners. 		

Both of these projects are in the early stages of development, and will be further embedded in the coming three years. The Welfare Rights Officer (noted below) will work to support the FNP team, as well as working across other parenting groups. They will work directly with families to help maximise their income in a range of ways.

Finally, there is a shared development of a Tayside Parenting Strategy, which will deliver a shared approach to working with parents and families across Tayside, and has close links with other workstreams within this priority group.

Performance Monitoring and Use of Data for Improvement

The next step for the group is to increase the intelligent use of the available data to inform our actions and possible future interventions. It is important that we can intervene at the earliest opportunity to make a positive difference to the outcomes for children and families, and so this will be a key focus for next year.

The use of the stretch aims will be a key area for attention, and making use of this data from the universal pathway programme will support a truly multi-agency, integrated approach to delivering the right help at the right time.

The Learning and Attainment Group: Numeracy

Work stream Sponsor	Work stream Lead	Work stream Participants
Pauline Stephen	Carol Lyon	<ul style="list-style-type: none"> • Karen Frain, Headteacher, Primary (Angus) • Audrey Cox, DHT, Primary (Dundee) • Eddie McArthur, PT Maths, Secondary (Dundee) • QIO, (PKC – appointment pending) • Andy McAdam, PT Maths, Secondary (PKC) • Tara Harper, Lecturer, ITE (Dundee University) • Nanette Brotherhood, Development Officer (Education Scotland)
Additional Resources Required	<ul style="list-style-type: none"> • Operational budget • Education Scotland support from Numeracy Team – TBC • Education Scotland support from Digital L & T Team – TBC 	
<p>Anticipated Impact Develop a shared understanding of what constitutes “effective learning and teaching approaches that promote positive attitudes and develop high expectations, confidence and resilience in maths” (Making Maths Count: Recommendation 4, Scottish Government, 2016). Establish a culture of collaboration, innovation and exploration. Please see workstream plan for measurement details.</p>		

The Learning and Attainment Group: Learning and Teaching

Work stream Sponsor	Work stream Lead	Work stream Participants
Pauline Stephen	Michelle Lewis	<ul style="list-style-type: none"> • Kas Mohammed, Headteacher, Secondary (Angus) • Karen Tough, Headteacher, Primary (Angus) • Lesley Elder, Headteacher, Secondary (Dundee) • John Neesson, Headteacher, Primary (Dundee) • Johnny Lothian, Headteacher, Secondary (PKC) • Lynn Lambert, Headteacher, Primary (PKC)
Additional Resources Required	<p>In addition to the planned work designed to improve the quality of learning and teaching in our classrooms we envisage a sub-group of this work stream being established to provide expert, professional support to develop capacity of teachers to use research and data more judiciously to support their work (this will be fully articulated in workstream 6 action plan). This sub-group would consist of 0.5FTE each of a QIO, and EPS and a data analyst. The approximate resource required for this, with oncosts would be £80K. In addition to this we envisage that we will require:</p> <ul style="list-style-type: none"> • Support from ES RALO to build system capacity for quality self-evaluation. (TBC) • Support from SG Improvement Officer to embed the model for improvement. (TBC) • Support from the GTCS to develop the research skills and capacity of practioners. (TBC) • OSIRIS – external facilitator to build capacity using evidence based approaches to improve feedback. • Operational budget • Support from Education Scotland in relation to evaluation of this work stream enabling a model for improvement to be identified and then rolled out elsewhere across the RIC– SCEL support required to provide bespoke input on leadership at this level. 	
<p>Anticipated Impact Developing effective Feedback to learners. Establish a culture of collaboration, innovation and exploration. Please see workstream plan for measurement details.</p>		

The Learning and Attainment Group: Leadership

Work stream Sponsor	Workstream Lead	Work stream Participants
Pauline Stephen	Bernadette Martin Scott	<ul style="list-style-type: none"> • Rodger Hill, Head of Secondary & Inclusion (PKC) • Paula Morrison, Headteacher, Primary (PKC) • Vicky Gardiner, Headteacher, Virtual School (Angus) • Kim Walker (Angus) • Pam Nesbitt, Education Manager (Dundee) • Tracy Stewart, QIO (Dundee)
Additional Resources Required	<ul style="list-style-type: none"> • Operational budget • ES and SCEL System Leadership Programme (7 participants) • ES RALO – building capacity of curriculum (subject) middle leaders in secondary - supply cover (3 x 8 PTs for 2 days each) • Advanced Leadership Practice – Professor Andy Hargreaves • Support from the NIF Team – TBC 	
Anticipated Impact Develop a shared leadership strategy to improve leadership and management of schools Establish a culture of collaboration, innovation and exploration. Please see workstream plan for measurement details.		

Learning and Attainment Group – School Improvement

Work stream Sponsor	Work stream Lead	Work stream Participants
Pauline Stephen	Kim Ramsay	<ul style="list-style-type: none"> • Danny Webster, Service Manger (Dundee) • Jim Hammond, Service Manager (Angus) • Kelly McIntosh, Service Manager (Angus) • Lorraine Will, Primary HT (Angus) • Johnny Lothian, Secondary HT (PKC) • Barry Millar, Secondary HT (Dundee)
Additional Resources Required	<ul style="list-style-type: none"> • Operational budget • Reciprocal School Improvement Teams – 6 schools involved in 4 visits per academic year - backfill and travel. 	
Anticipated Impact Develop the capacity within schools and clusters to improve learning by supporting the development of schools as learning organisations within the context of children’s services. Establish a culture of collaboration, innovation and exploration. Please see workstream plan for measurement details.		

Learning and Attainment Group – Curriculum

Work stream Sponsor	Work stream Lead	Work stream Participants
Pauline Stephen	Patricia Watson, ES Regional Adviser	Kim Ramsay, QIO P & K Annette Beason, ES (SCEL) Programme development team: <ul style="list-style-type: none"> • Senior school leaders from across the TayRIC (2 secondary and 1 primary from each LA) • Other ES colleagues as appropriate eg. 1 x SEO Curriculum Team 1 x DYW team 1 x CLD team 1 x Digital Learning and Teaching team
Additional Resources Required	Operational budget - supply cover (3 x 8 staff members for 2 days each)	
Anticipated Impact This workstream aims to strengthen approaches to evaluating, designing and developing the curriculum. This will be achieved through collaborative work to co-construct and deliver a programme to support schools across the RIC to improve their curriculum. The programme will be aimed at middle leaders in primary and secondary schools across the RIC. The intended outcome is for senior and middle leaders to have a deepened understanding of the principles of curriculum design and development and for this to impact positively on their approaches to self-evaluation and curriculum planning.		

Health and Well-being

Work stream Sponsor	Work stream Lead	Work stream Participants
Lorna Wiggin	Elaine Cruickshank	<ul style="list-style-type: none"> • Service Manager PKC Third Sector Interface • Education Officer (Dundee) • Senior Manager (SWD) (Dundee) • Service Manager, Evidence 2 Success (PKC) • Quality Improvement Officer (PKC) • Service Manager ASN/Educational Psychology (Angus) • Lead Officer Tayside ADPs (Angus) • NHS Tayside Clinical Services Manager (Paediatrics/CAMHS) • NHS Tayside Child Health O.T. Service Manager (AHPs) • NHS Tayside Interim Service Manager Children & Families (Angus) • NHS Tayside Public Health Dept. - Consultant in PH medicine/Portfolio Lead Children & Young People • NHS Tayside Public Health Dept. - Executive

		<p>Lead Sexual Health & BBV</p> <ul style="list-style-type: none"> • NHS Tayside Public Health Dept. – Dietetic Consultant PH nutrition • NHS Tayside Clinical Lead CAMHS • NHS Tayside Consultant Clinical Psychologist (CAMHS) • NHS Tayside Community Paediatrician
Additional Resources Required		<ul style="list-style-type: none"> • Operational budget • Tayside Parenting Co-ordinator – development officer for 23 months to support implementation of the Tayside Parenting Strategy
<p>Anticipated Impact</p> <p>The focus of the group’s work is the development of four new Tayside multi-agency strategies in relation to:</p> <ul style="list-style-type: none"> • Mental health • Parenting • Substance use prevention • Child healthy weight <p>as well as a fifth area of work; implementation of the national Pregnancy and Parenthood in Young People strategy.</p> <p>In order to achieve the above, individual Leads have been identified and Task & Finish Groups have been established for each area of work. Progress for each of the areas is at different stages, with the Parenting strategy development most advanced.</p>		

Looked After Children, Care Leavers & Young Carers

Work stream Sponsor	Work stream Lead	Work stream Participants
Mark Armstrong	Glyn Lloyd	<ul style="list-style-type: none"> • Senior Manager, Residential Services (Dundee) • Education Manager (Dundee) • Senior Manager, Children and Families (PKC) • Service Leader, Children, Families and Justice Service (Angus) • Service Manager, Third Sector Interface (Angus) • Service Manager, Carers Centre, Dundee • Locality Reporter Manager, Scottish Children’s Reporter Administration • Chief Inspector, Police Scotland • Senior Manager, NHS Tayside
Additional Resources Required		<ul style="list-style-type: none"> • Operational budget • SAC funding for LAC will be used to develop effective supports for pre-school, primary, secondary and special young people in line with our Corporate Parenting Strategy • SAC funding for LAC will be used to extend advocacy and children’s rights for our most vulnerable young people
<p>Anticipated Impact</p> <p>The main areas of focus for future work are the development of a regional engagement and participation strategy for Looked After Children and Care Leavers; the development of a regional performance framework and a consistent approach to short-breaks for Young Carers; shared risk assessment pathways and preventative approaches for young offenders; a regional approach towards advocacy; and inclusion strategies for children with additional and complex support needs.</p>		

Safeguarding and Child Protection

Work stream Sponsor	Work stream Lead	Work stream Participants
Graham Binnie	Jacquie Pepper	<ul style="list-style-type: none"> • Ray Birnie, Detective Inspector (Police Scotland) • Peter Nield, Assistant Director (Barnardo's) • Jayne Smith, Lead Nurse Child Protection, NHS Tayside • Katherine Lawlor, Consultant Paediatrician, NHS Tayside • Arlene Dickson, Third Sector Strategic Officer for Children's Services, Voluntary Action (Angus) • Niki McNamee, Team Leader, Protecting People Partnership (Angus) • Andrew Beckett, Lead Officer (Dundee) • Ross Drummond, Child Protection Inter-Agency Coordinator (PKC) • Bill Atkinson, Independent Chair (PKC) • Norma Ritchie, Independent Chair (Dundee) • Christine Knight, Independent Chair (Angus)
Additional Resources Required	<ul style="list-style-type: none"> • Operational budget • Resource for additional requirements of independent child protection chairs. 	
<p>Anticipated Impact</p> <p>Our approach to protecting children and young people will be integrated and focused on early intervention, immediate action and effective intervention to remove and reduce the risk of significant harm.</p> <p>The work of Chief Officers and Child Protection Committees is crucial to securing a culture where the care and protection of children and young people is at the heart of everyone's job.</p> <p>By mobilising the whole workforce and promoting strong universal values of doing everything possible to enhance the lives of children and young people is not just about having effective processes to protect children it is also about making sure that children and young people:</p> <ul style="list-style-type: none"> • have the knowledge and skills they need to keep themselves safe at home, school and in the community • learn to adopt healthy lifestyles and making positive life choices • are kept safe as a result of services acting quickly and working effectively together when they may be at risk • go on to be supported well through targeted interventions and universal services when they are the subject of concerns • benefit from holistic plans which include access to early literacy programmes; positive planned transitions and support, encouragement and opportunities to develop and learn new life skills • benefit from evidence-based nurturing approaches which have a positive impact on their wellbeing and readiness to learn • who are no longer able to remain at home are thriving as a result of positive placements which support their educational achievement and attainment • benefit from a wide range of leisure, recreational and extracurricular activities • benefit from trusting relationships with staff and carers and are developing a positive sense of self-worth and identity • encouraged to develop their sense of responsibility and self-efficacy. 		

We know that children within our child protection system are also most likely to suffer inequalities related to health and experience the consequences of poverty. By making sure Getting it Right for Every Child approaches are central to planning for individual children and young people when they are at risk of or have experienced neglect, abuse, exploitation and significant harm has a direct positive impact on the outcomes for individual children and likelihood that the negative impact on their ability to learn and achieve or experience interruptions to their learning is minimised.

Performance and Data

Work stream Sponsor	Work stream Lead	Work stream Participants
Sheena Devlin	Paul Davidson Service Manager (PKC)	<ul style="list-style-type: none"> • Senior Information Analyst Officer (Dundee) • Manager, Quality Improvement & Performance (Angus)
Additional Resources Required	<ul style="list-style-type: none"> • Funding for a Graduate Trainee to support performance reporting and data analysis across all 5 workstreams 	
Anticipated Impact [Describe the purpose and anticipated impact of the additional resource requested, including expected outcomes and how these will be measured.]		

Regional Improvement Collaborative Resourcing
Pre-birth and early years welfare project Perth and Kinross

This project will increase the uptake of available welfare benefits of families with children in the early years of their life that might be experiencing poverty or be likely to experience poverty in the future in Perth and Kinross including a focus on rural Perthshire areas. Evidence demonstrates that the highest rate of economic return comes from the earliest investments in children's lives. Evidence indicates that poverty increases the likelihood of poor health and wellbeing outcomes for children. This begins in pregnancy with the healthy development of the fetus affected by poor diet, stress and anxiety, housing conditions and fuel poverty.

The project would seek to strengthen relationships and referral pathways between health and social care professionals involved in pre-birth and the early years of a child's life. Including midwives, family nurses, health visitors, mental health practitioners and social care early year's staff with the Council's Welfare Rights Team, in order to provide a universal, holistic service targeting areas in Perth & Kinross which have been identified as an increased child poverty area.

The Perth & Kinross Welfare Rights office recognises that many women do not receive their full entitlement of benefits while pregnant or when their baby is born. For example, nationally, at least 25% of women do not access Healthy Start vouchers. The vouchers are worth £899 to support children from the birth to the age of four.

Projects in Leith, Scotland have been successful in providing welfare rights information to families experiencing poverty with a net average result of between £4,500-£5,000 increase in actual benefits for families per annum.

Example from previous projects locally:

Maternity Welfare Project

In conjunction with the Improvement Service, the Family Nurse Partnership and Perth Midwifery Services worked in partnership to ensure that pregnant women had access to welfare services at the earliest opportunity via seamless referral from Health to the Welfare Rights Team. Referrals were offered on a universal basis with no requirement for health practitioners to identify need, this approach was taken to reduce stigma. A test of change demonstrated that all women were offered the referral and all women took up the offer. Feedback from health practitioners was positive and for midwives specifically discussing the referral to the Welfare Rights Team made the completion of the Maternity Interview more meaningful with regard to the section dedicated to the need for advice on finances, benefits or housing issues. All women referred to the Welfare Rights Team were given comprehensive welfare benefit checks and any other holistic advice in relations to their finances that was required/appropriate. The project team recognised the potential for contact with the target group through other partner agencies, but agreed initially to test the model with health staff that had direct contact with mothers before and after the baby's birth. This project has been successful and the model is reciprocal however it is felt being able to have a wider reach to other professionals working with families would increase sustainability and also benefit more children and families in the area.

Kinship Care referral process

A seamless process between the Kinship Care Team and the Welfare Rights Team whereby impartial and individualised support and advice can be accessed where we have consent from the kinship carer. This applies to all kinship carers; approved and informal.

This process has been in place for almost three years is successful and is felt it is reciprocal in delivery to families. The Welfare Rights Team regularly identify people who are Kinship Carers and who are not aware of their entitlements. Similarly the Kinship Care Team seamlessly refer Kinship Carers to the Welfare Rights Team in order to access advice and assistance re entitlements. Referrals are around 60 families per year.

Collaborative approach

This project will seek to identify the target group within the stated areas through engagement with local health and social care staff.

The learning from this project will inform the development of a pathway for pregnant women in Perth & Kinross regarding Welfare Rights support *with the intention of extending this pathway for all pregnant women in Tayside.*

If this approach is successful there could be opportunities to spread the methodology to other key professionals within the Tayside collaborative.

Linking up and expanding existing processes in welfare and health and children's social care will lead to improved outcomes

The biggest challenge for the welfare rights team is identifying families at risk of poverty at an early point in their life. Working in a more collaborative approach with all professionals will aim to reduce the amount of families in poverty crisis with an early intervention approach to the model of care will reduce the amount of children living in severe poverty. Linking up services involved with families via a voluntary referral pathway should increase the number of families with young children accessing appropriate welfare benefits in Perth.

The range of entitlements and benefits available to pregnant women are not always obvious, with the potential impact that women are not made aware of what they could be entitled to. Information needs to be available that outlines the clear range of welfare benefits and entitlements available, in an easy to use format that also details a simple process for access. Professional awareness of range and access may increase outcomes.

Shared understanding of the value of other professional's contributions at different points of the maternity pathway will lead to improved outcomes.

Welfare rights staff have briefed health professionals in the past, however due to the pressures of service and although welfare benefits has recorded an initial increase in uptake following a briefing, the numbers of referrals drops in the weeks/months that follow. Developing opportunities for shared learning, practice development, information sharing and frequent reminders of the value of other professional's contributions will result in a sustained awareness and value of other professional's contributions, thereby improving outcomes for the client group.

Funding requested:

1 x Welfare Rights Officer: £35,253

This would be a dedicated member of staff to liaise with families and services with children in the pregnancy period and early years. This member of staff would also be a key link

personnel to develop professional understanding of the welfare system and service.

As referrals increase this funding would have to be reviewed alongside capacity. The impact on childrens service health and social care professionals would also have to be monitored closely in regards to workforce capacity.

Application for funding to support implementation of the Solihull Approach model across the workforce for children, young people and parents in Tayside

The Aim

Taking a 'whole systems' approach, the Tayside Collaborative will initiate a training programme upskilling practitioners in services for children and young people (public, 3rd and private sectors), to use the Solihull Approach to enhance the impact of their interventions with parents. This will support the commitment in the Tayside Children, Young People and Families Plan to 'provide targeted multi-agency support to families' and will be a key action in the Tayside Parenting Strategy, directly contributing to delivering on one of its improvement priorities:

Families have access to effective services that are delivered by a skilled and confident workforce that value the role of parents.

Developing the collective workforce and establishing a common language and way of working

This initiative will enable transformational workforce development that will further increase preventative approaches and support staff to have a common language. The Solihull Approach provides staff with a practical way of working with and supporting families; empowering them to reduce challenges and behaviours that can impact on their child's opportunity to access and gain optimal outcomes from their early learning and childcare entitlement. It brings together a range of good practice approaches that help practitioners to address emotional problems in a different way, aiding child development and encouraging positive behaviours in parents and children, whilst building greater confidence in their own skills and practice.

Training and implementation of the model will be supported by a series of Tests of Change to ensure that optimum impact is achieved in each setting.

The Solihull Approach

The Solihull Approach theoretical model is developed from three cornerstone concepts: containment, reciprocity and behaviour management; providing the practitioner with a way of working and thinking about their work. The practitioner provides containment and reciprocity to the parent, restoring the parent's ability to think, thus enabling the parent to provide containment and reciprocity to the child to help the child cope with their own emotions and anxieties. Unaddressed these emotions and anxieties for either parent or child may form barriers to child accessing their childcare entitlement.

The Foundation level training enables practitioners to use the Solihull Approach to inform how they intervene with a family in the course of their mainstream work; it does not train them to deliver a specific programme. Therefore it is enhancing the effectiveness of what they do not adding to their workload or changing their remit.

Commitment for services

A recent survey of managers identified widespread support for implementation, identifying the potential to provide a consistent approach for families and a shared language and aims for staff as particular benefits.

Funding requested

A training co-ordinator will be appointed for 23 months to establish a programme of foundation training and 'training the trainers' courses, and a 'bank' of trainers from local partner organisations. This activity will deliver a group of 300+ trained staff using the Solihull Approach in practice in year 1, a further 400+ trained staff in year 2 and a bank of 60 additional trainers from across the sector committed to delivering 2 courses per year in subsequent years. The co-ordinator will also support implementation of the model in workplace settings through the creation of a Network that will help practitioners to embed the Solihull Approach in their practice.

A small budget will also be required to pay for training venues and training/maintenance resources.

23 month Training Co-ordinator Post (PR8 - £44,292 per year) - £92,111

Solihull Approach online manuals for teams - £8,280

Training venues - £5,000

Total funding applied for £105,391

Sustainability

The implementation model supports sustainability by establishing an optimal number of trained staff in key locations in years 1 and 2, embedding the model as the 'way of working'.

Year 1 A programme of training and 'training the trainers' courses delivered and a bank of additional trainers established. Network established to support implementation in practice.

Year 2 Programme of training expanded through use of newly trained trainers and further 'training the trainers' courses delivered. Network becomes self-sustaining in respect of supporting implementation.

Subsequent years – network also assumes responsibility for programme of training and support.

Evaluation of Impact

A number of quantitative measures will be used to evaluate the impact of this investment, including:

- Number of training courses delivered;
- Number of practitioners trained
- Number of different teams and organisations with trained staff;
- Number of practitioners actively using the Solihull Approach in their work 6 months after the training.

In addition some qualitative information will be gathered to inform the evaluation at the end of years 1 and 2; this will include:

- Feedback on the impact of the training on practitioners knowledge and practice;
- Feedback from parents who have been supported by a practitioner using the Solihull Approach;
- Feedback from Managers on the impact on staff.
