

### **3 WINTER MAINTENANCE POLICY AND LEVEL OF SERVICE 2017/2018 (AN84-2017)**

Reference is made to Article VII of the City Development Committee of 24th September, 2012 where, following the severe winter of 2010/2011 and detailed reviews of all stakeholders, improvements to the policy and level of service for winter 2012/2013 were approved. This improvement policy and level of service was adopted for 2013/2014, 2014/2015, 2015/2016, 2016/2017 and it is recommended that it is adopted again for 2017/2018.

The Dundee salt holding at the commencement of winter has been set at the level of 8,200T as per the Changing for the Future 4 review revenue savings that were identified for 2016/2017, which reduced the salt holding down from 10,000T.

If the winter requires salt usage above the previous 6 years average, alternate resilience provisions are in place, including mid season re-stocking from Scotland Excel suppliers, access to Tayside Contracts and Transport Scotland salt resilience stock.

A copy of the current policy can be obtained on the Council website by using the following link.

The Committee is asked to agree the foregoing.
